EXPLANATION

This document is one of a series of Urban Data Reports published by the Department of Planning for the purpose of assisting city officials, civic leaders, and citizens involved in planning the future development of the City of Coral Gables.

This report entitled "Traffic Counts for Major Intersections in Coral Gables" contains twenty-four (24) hour traffic volume counts for most of the City's major streets and intersections. The data is extracted from all the existing traffic counts carried out during the past decade by the Metro-Dade County's Department of Public Works, Highway Division.

The attached chart provides the 24 hour count by street in alphabetical order. Also indicated is the location, direction, and year of each count. Copies of the complete tabulation sheet, for each traffic count location, are available in the office of the Coral Gables Planning Department.

SUMMARY TRAFFIC COUNT DATA
AT MAJOR INTERSECTIONS
