Miami, Florida 33148

Because ACES maintains a strict sense of professionalism, it's work exceeds the specifications established by manufacturers and Federal agencies.

Not only are its shops capable of detailed engine repair and over haul, but they are fully diversified for plating, tooling parts provisioning and testing of bare engines or full QEC configurations. ACES holds Certificate 3604 awarded in 1946 by the Civil Aeronautics Administration. In May 1967 the certificate was extended by the Federal Aviation Administration to cover Pratt & Whitney aircraft JT8D engines.

## CASHIERS! TELLERS! — CLERKS! —

Do your employers furnish you with  
the latest edition of the City Directory?

You need it at your elbow at all times, to protect your company from forgers and bad-check artists. A few questions, checked against City Directory information, will trip them at once. Intelligent use of the City Directory for this purpose has saved thousands of dollars and helped make some cities "too sharp" for bad-check "operators."

# total avionics programming

Aero Systems' "Total Avionic Programming" encompasses everything from the sale and delivery of both new and overhauled certified equipment and instruments at competitive prices, to the engineering and installation of complete communication, navigation, radar and flight control systems and related electronic systems for aircraft.

In addition to our executive headquarters and sales, service, engineering, instrumentation and installation facilities in Miami, Florida, we now have 3 excellent service facilities with 3 excellent locations in the Northeastern United States. They are: Aero Systems' Airmar Division at JFK Airport, New York; Aero Systems' Airmar Division at Newark Airport, New Jersey; Aero Systems' Airmar Division at MacArthur Field, L. I., New York.

Aero Systems answers the industry's need for the facilities and services of a large, multi-faceted organization that provides total "one-stop" sales, service, engineering and installation.

Look first to Aero Systems, the first name in international avionics.

# ***NEW IDEAS AT THE NEW PORT OF MIAMI***

***Some unusual time and trouble-savers that  
make a shipper's life a little easier.***

For instance, we designed the port with roll-on, roll-off platforms for loading 4 ships simultaneously with sealed trailers. We built cargo buildings to provide over a half-million square feet of clear-span covered storage space. We have 9200 feet of berthing, where ships can turn at berthsite. We're minutes from downtown Miami... minutes from open sea. We offer 6000 feet of dockside railroad and a mile of make-up tracks. For these, and many other reasons, service to the Islands, Central and South American ports is fast, frequent and convenient. Find out for yourself how the new Port of Miami can make life a little easier — for you!

CASHIERS! TELLERS!  
— CLERKS! —

Do your employers furnish you with  
the latest edition of the City Directory?

You need it at your elbow at all times, to protect your company from forgers and bad-check artists. A few questions, checked against City Directory information, will trip them at once. Intelligent use of the City Directory for this purpose has saved thousands of dollars and helped make some cities "too sharp" for bad-check "operators."
