History

The documented history of South Miami Heights began at the turn of the century when the rich farmlands of South Dade lured pioneers down through Little Hunting Ground, later known as Coconut Grove to Big Hunting Ground, now known as Cutler (Jensen 109). When Henry Flagler extended the Florida East Coast Railway south from Miami to Homestead, it marked the beginning of South Miami Heights (Jensen, 110). The Hurricane of September 1926 devastated the area and nearby towns. The will of the town's residents permitted the Town to survive the disaster. Although the Town requested federal assistance, asking Congress to "relieve the people of their income tax for the current year", none was received. To make matters worse, the Florida East Coast Railway station burned down, leaving the town without a station for many years (Miami-Dade.gov).

During World War II, South Miami Heights development temporarily slowed, but the post-war period brought exponential growth. Today as the region recuperates from past Hurricanes, (Andrew, Katrina) many efforts are moving towards making South Miami Heights a local recognized community. South Miami Heights past and present has benefited from 'The Moss Plan', an economic and community revitalization plan for South Miami-Dade that developed the community's input after the devastation of Hurricane Andrew in 1993 (Team Metro: Richmond Heights).
