September 4th, 1919.

Myers, Gates and Ralston,
Fletcher American Bank Building,
Indianapolis, Indiana.

Gentlemen :

I have your letter of the 27th notifying me of
the Lamb Case set for October 28th.

I am commencing again this Fall to have serious
trouble with Hay Fever and Catarrh and my Physician has
advised me to get out of this climate as quickly as possible
and go either North or South at once. I should like to go
South within the next couple of weeks, and do not want to
think of returning during October. Isn't it possible
to advance this trial to some time during September - or
do you think you can settle the matter now with the other
people for two or three hundred dollars ?

Let me hear from you.

Yours very truly,

CGF:R

Health

September 11th, 1919.

Mr. A. F. Bement,
Garfield Building,
Detroit, Michigan.

Dear Mr. Bement :

I have a letter from your Miss Butler, of September 8th, regarding further postponement of the new sections on the Lincoln Highway in Utah.

I have been having considerable trouble in the last few days with Hay Fever, and I am going to try and get to Salt water just as quickly as I possibly can arrange my affairs here. Dust is causing me a lot of trouble and I would like to have you not figure on me for a part of these opening exercises. I will be very glad for you to represent me at any exercises they may have, whenever they may have them.

Yours very truly,

GGF:R

Health

Carl C. Fisher,
Miami, Fla.

My Dear Carl:

I examined Johnnie Hennessy yesterday. He came in with a bump on his head, of no consequence however, and took up the matter of his broken arches also. It is unusual to find a boy of his age and physique with such complete loss of arch support. The fact that Johnnie has filled out so much in the last two years and has become so muscular shows what type of man he is certain to develop into and I am sure that with these flat feet, he will always be in trouble unless some correction is made.

I have recommended him to get anatomic shoes such as he wore several years ago, procure a last that is comfortable and wear the same shoe continually for the next two years at least. In that time I believe his skeleton will have fairly definitely molded itself and some permanent relief may follow the use of this support. As he is going now, his feet will gradually settle with a completely fallen arch that would slow him up even in ordinary walking. He is beginning to notice the disturbance in his calf muscles with pain usually most severe from such deformity.

I started to shove the little devil about the office yesterday and had to back up as he has unquestionably outgrown his short pants and I had forgotten that it had been some two years since I last kicked him around.

I am very sorry that you were unable to play a return engagement of the last tennis match. I appreciated the fact that you had injured your spine that morning, your racket needed restringing, that the net was too high and the court too big but with all that I will be glad to give you one point a game and take you on at your convenience.

With very kindest regards, I am

Very sincerely

CDH*BD

*It was greetings to James and
Gouney,*

CDH

December 23rd, 1919.

Dr. Chas. D. Humes,
707 Hume-Mansur Building,
Indianapolis, Indiana.

Dear Doc :

I have yours regarding Johnny : I have talked to John several times and I am surprised that he hasn't taken more of an interest in his own condition. I am writing him a letter today, telling him follow your advice absolutely.

Sometimes I think I do him a great injustice to keep him interested in tennis. I am satisfied that unless something very radical is done in a short time, he will be out of tennis altogether, and I would hate very much to see him get in, that shape.

If you will take the trouble to go buy him two or three pairs of the right kind of shoes, I wish you would do so - and have them charged to me.

Thank you for calling the matter to my attention, and with greetings of the season -

Yours very truly,

CGF:R

health.

March 25th, 1921.

Mr. James Couzens,
Mayor of Detroit,
Michigan.

Dear Mr. Couzens :

I had a little talk with Gus Schantz the other day about the Detroit property - and I am enclosing you herewith a blueprint showing the lay-out and copy of a letter from our agents in Detroit, which should give you an idea of the price for which the property could be purchased now, or rather, the property next to Olds'.

I am thoroly posted as to what is necessary to do in developing this into the finest piece of residential property in the City of Detroit. I think, after the property has been acquired, that the work can be well done for \$1,500,000.00, which would include a small hotel, two good polo fields, some tennis courts, a small yacht club, and a first class swimming pool. This would also include sufficient roads and the necessary dredging to put the property on the market. There should be a profit of something like two and a half million dollars on this piece of property in about six or seven years.

The main reason that I am interested in the property and want to see its development, is that I want outdoor work in the Summer time in the North. I must leave Indianapolis on account of Hay Fever, and I must be able, if Hay Fever attacks me, to get on my boat and get away. If we had had an ordinary business season here this year I would be able to handle the entire transaction myself without asking for any additional assistance or stockholders, but as the matter stands now, I can commence to do no development work until either friends who will come right along with me or additional stockholders have been secured to take on the additional load.

Our average price per acre that we get for our improved lands here is about \$20,000.00. I consider the price of this land to be very reasonable, all things considered - the location and the fact that it is already connected with some few improvements that would be valuable to the whole scheme of development.

There is enough wealth in Detroit to sell all of this property to local people. We would not depend very much upon the attraction to outside investors. The price of this property would be the most reasonable water frontage anywhere around Detroit, and the residential feature would be thoroly first class.

I would like to have you consider the matter and let me know right away if you would be interested, as I have two or three other people in mind

Mr. James Consens. #2. March 25th, 1921.

whom I am thinking of trying to interest. Personally, I think something of this kind would be just the thing for you as this outdoor interest would be very beneficial to your health - and I should like to have you become interested.

I am sending a duplicate of this letter to Mr. Schantz. If you are not interested, will you please return the enclosed map to me - and possibly you could suggest some reliable person or persons to whom I could send the plans. The scheme, however, might look quite impractical to Detroit people who have not seen what has been done at Miami Beach. In a very few years, our work here will show us a tremendous profit. Our prices are advancing steadily and under normal conditions we would have sold between our three companies here this year somewhere between three and four million dollars worth. As it is the three companies will sell only about one million - our company heading the others by selling in the past two or three weeks something like \$400,000.00, giving our own company a total of \$800,000.00 so far this season.

Yours very truly,

CGF:R

DR. CHARLES D. HUMES

July 25 - 1921

Mr. Carl G. Fisher,
Fisher Automobile Co.,
Indianapolis, Ind.

My dear Carl:-

I have reviewed the analysis and it seems to indicate that your elimination is not quite up to par. I know all about your dainty appetite and that you confine your eating meat only to the times when you feel like a lion, and then you must eat it in your sleep.

Seriously, I think you should conduct yourself like the ordinary human and submit to a thorough physical examination. I particularly emphasize the necessity of looking into your blood chemistry, the only test which really shows the effects of improper diet.

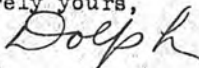

You will note that there are several suggestions in this report, each of which represents the nominal sum indicated in your letter.

Let me see you in the next two or three days, as I leave on next Sunday.

Very sincerely yours,

C. D. HUMES.

My dear Jimmy:

Replying to yours of the 19th - I have
forwarded your letter to Mr. Ed. Romfh of the First
National Bank, Miami, Florida.

Certainly a business manager for the City
who has had some experience ought to be the man for the
position.

I am still hobbling around and won't be
able to play any active polo for some time.

Yours,

CGF:M

August 27th, 1921.

Mr. G. Maurice Heckscher,
50 East Forty Second St.,
New York City, N. Y.

My dear Maurice:

I have yours of the 23rd - am glad you are well pleased with the car. All I hope is that you will not get too reckless with it.

Allison and myself have been thinking for some time about getting a place on Long Island. As far as I am concerned, I must get out of this climate as I have the devil's own time with hay fever and catarrhal conditions that entirely disappear on salt water. If I wasn't so hard up at the present time for ready cash, I would get on a train and come down to New York and find a place.

Allison has about a million dollars in his home place here and it is going to be pretty hard for him to dispose of it. While I have only about \$250,000.00 in my place - it will not be hard for me to sell it.

I haven't any idea how much money your father has invested in his place or the price he wants for it. Right now, I don't want to assume any large liabilities until things commence to move more at Miami Beach. I have been having some correspondence in regard to property on the Connecticut shore and would expect to go down and look it over within the next few days. In the meantime, it might be worth while to tell me just how much money your father wants for his place and I would certainly like to know why you prefer to live over at Westbury instead of being on Huntington Bay. Personally, I like water frontage very much.

It will not be necessary for me to get down to New York very often, as I figure on having my office in some old farm house located some place near my home. I do want to get where I can have the prevailing salt air breezes. I want to knock my catarrhal condition out.

Kindly drop me a line and tell me what you think of the Connecticut shore. There seem to be two or three very good bargains over there.

Yours -

P. S.

You may be interested to know that Allison's motors, while too heavy to compete with the very light racing motors at Buffalo for actual speed, break all records for sealed motor performances. One motor in the 47 foot hull, after running 100 miles to Detroit without any attention, was run from Detroit to

G. H. H.

Buffalo, a distance of about three hundred miles, without touching the motors, then went thru fifty mile race heats with sealed hatches, and the race without unlocking the hatches or breaking the seals. The boat returned to the Detroit Yacht Club making a total distance of about nine hundred miles without any motor attention whatever, and almost five hundred miles of the distance under officially sealed hatches. When the motor was finally examined there was absolutely nothing wrong with it - nothing to do except drain the oil and put in fresh oil and this same motor and boat is re-entered in the races in Detroit this coming week. Altho not fast enough to hope to win the races, Allison wishes to demonstrate as much as possible that this motor doesn't have to be tinkered with or rebuilt between trips.

G. G. F.

GCP:EM

DR. CHARLES D. HUMES
707 HUME-MANSUR BUILDING
INDIANAPOLIS

October 26 - 1921

Mr. Carl Fisher,
434 North Capitol Ave.,
Indianapolis, Ind.

My dear Carl: -

I am very sorry that there has been any delay about the reports of your recent examination. I regret that you were unable to go into the Hospital today for a re-examination, which the Laboratory Pathologist thought was necessary.

There is enough however from the examination only made recently to justify certain changes in your diet and also the prescription which you will find enclosed, which are very necessary and essential for your continued good health. First of all you must limit your intake of sugar and that means to avoid highly seasoned foods, jellies, pastries, syrup, candy and an excessive of sugar on whatever food ordinarily requires.

The blood examination reveals the fact that regardless of your apparent perfect health, you do not have the normal number of red blood cells and they are not carrying proper percent of hemoglobin or coloring matter. Ordinarily in a man of your years and ruggedness should possess ninety-nine percent hemoglobin at least, instead of eighty-seven percent which you now carry.

I do consider it very necessary Carl, for you to submit to further blood analyses, as regardless of the apparent infringement upon your time. You have been subjected, in the past years, to several various types of minor infections - which have properly combined to produce the present condition. I believe that every abnormal phase can be thoroughly corrected but it does demand your absolute cooperation.

I wish to encourage your eating more eggs and drinking more milk and cream, together with a liberal amount of red meat. These are essential in building up your blood. I want you to report soon at my office for a general going over and at your earliest convenience arrange either to meet me at the Hospital or go there at your own leisure and have Doctor Warvel take another specimen of blood for re-examination. In the meantime have the Prescription filled, which I have enclosed and take as directed.

Very sincerely yours,

Dolph

CDH/FG

DR. CHARLES D. HUMES

October 28 - 1921

November 1st, 1921.

Dr. Chas. D. Humes,
707 Hume Mansur Bldg.,
Indianapolis, Ind.

1000 North Capitol Ave.
Indianapolis, Ind.

Dear Dolph:

My dear Sir:

Replying to yours of October 28th - first, I would like to know what the medicine is in the prescription you gave me and what it is for. Also, I would like to know what the analysis was of the first test made of my blood. I understood the figures at the time this test was made to indicate that I was some 25% off. - In fact almost 30% shy. I would also like to know what ordinary causes this situation as is apparent in my case. Contrary to your statement, I had not been subjected in the past year to various types of minor infections. In fact the only infection I ever had was after the injection of serum which was about five years ago and I am certainly cured for any desire for serums for any kind of trouble.

Now, to put the matter plainly, I am not going to follow any suggestions you make unless I know exactly what you are trying to do. Because you hand me a bottle of pills with the suggestion that I eat one every hour or so, doesn't mean that I am going to do so. I want to know the why and wherefore of every step that has been made in this matter and already more than a month has passed without the information which I think I should have received immediately after the first examination.

There is no use in wasting time at the hospital taking blood tests unless the result of these tests is very closely followed up and I want to know more about the condition of my blood - what caused it and generally what does cause such a condition in other people and the best way to correct it. Particularly I want to know about the medicine you are giving me.

Now, if you have the record in your office and you know what you are doing yourself, you can pass the information to me immediately, and if not, I will buy myself a bottle of Perrins and tell you and the other doctors to go to Hell.

Yours -

CGP:M

I have enclosed the prescription which I have enclosed in the letter of the 28th of October. I have also enclosed a copy of the report of the analysis of your blood. I have also enclosed a copy of the report of the analysis of your blood. I have also enclosed a copy of the report of the analysis of your blood.

Very sincerely yours,

[Handwritten signature]

11/1/21

DR. CHARLES D. HUMES
707 HUME-MANSUR BUILDING
INDIANAPOLIS

November 3 - 1921

Mr. Carl G. Fisher,
Indianapolis, Indiana.

My dear Carl: -

Replying to your communication of November 1st., I must first express some little surprise at your very sudden interest in your professional care. Heretofore it has been utterly impossible to offer any sort of explanation for treatment and I really wish to congratulate your medical enthusiasm which you now exhibit.

The various tests which have been made of your blood have shown what I accept as proof of the fact that there is an absence of the normal coloring matter of your blood. This indicates that the red blood cells are not obtaining the proper amount of oxygen and that because of this the tissues of your body are not being properly nourished. This is particularly surprising in a man of your age and your unusual physical development and activity, and for that reason I wish to rule out any form of infection which you might have acquired in the last fifteen years. I am trying to over-come the physical defect which interferes with the normal production of red blood cells and whether the treatment comes in the form of a pill, a powder or a potion, I want you to accept it and not worry about the ingredients. It is not hard to explain however that such a condition as yours needs iron in various forms and soda and other elemental drugs. It is necessary that your long bones, your spleen be stimulated and that a substantial tonic, such as is included in the prescribed pill be regularly taken.

The fact that I have never known of your writing a letter of such length before leads me to believe that you are in a facitious mood today. It will be very difficult however for me to follow up the records of your blood, unless you come into the hospital when you are ordered and do otherthings as seem necessary.

I am very glad to learn that the boy is coming out all right, and I sincerely hope that he will have no further interference.

Believe me,

Very sincerely yours,

Charles D. Humes
CHARLES D. HUMES.

CDH/FG

DR. CHARLES D. HUMES
707 HUME-MANSUR BUILDING
INDIANAPOLIS

November 14 - 1921

health

Mr. Carl Fisher,
Indianapolis, Ind.

My dear Carl: -

After my examination this morning and reviewing all the laboratory findings in your case I wish to furnish the following general out-line: -

The condition of your blood, which indicates without question some sugar retention makes it imperative that we make a definite correction in your diet. The food which you crave, such as potatoes, baked beans, green corn, boiled rice, macroni, artichokes lima beans, parsnips and green peas, I mention only to condemn as improper for you to eat at this time. I am particular to mention them and caution you at the same time, so that there can be no claim that this was not brought to your attention. These articles mentioned contain too large a percentage of carbo hydrates and for that reason must be avoided for the present. The following vegetables are allowable: -

Lettuce, cucumbers, spinach, asparagus, rhubarb, endive, marrow, sorrel, sauer kraut, beet, greens, dandelion greens, swiss chard, celery, tomatoes, brussels, sprouts, watercress, sea kale, okra, aauliflower, egg plant, cabbage, radishes, leek, string beans, brocoli, pumpkin, turnip, kohlrabi, squash, beets, carrots, onions, mushrooms.

Fruits as follows: - ripe olives, grapefruit, lemons, oranges, cranberries, strawberries, blackberries, gooseberries, peaches, pineapples, watermelon.

Nuts as follows: - Butternuts, pignolias, brazil - black walnuts, hickory nuts, pecans, filberts.

This list of vegetables, fruits and nuts will allow you a good deal of liberty and will afford you all the carbo-hydrates that you need. The objection to the assorted peanuts which you ordinarily like is that they are specially prepared in oil and contain too large a quantity of fat and should not be eaten, except in small quantities after your meals. They are so very heavy that a small quantity is enough to satisfy your regular appetite, and to interfere with your mixed diet. There seems to be no objection whatsoever to any quantity of proteid, that is meat, which you desire, such as bacon and eggs and steaks etc.

When you return to Miama I know that you will be able to add the more delightful sea foods.

There are several things, Carl, which I wish you to keep in mind without burdening yourself with a lot of formulas: -

- (1) Limit your quantity of sugar.
- (2) Increase your elimination by drinking larger quantities of any alkaline spring water of your choice. I would suggest that you limit also your Scotch for a month or so. Along this line I know you are very temperate in your habits, but during the tremendous strain of the last month, I can understand how you might

DR. CHARLES D. HUMES
707 HUME-MANSUR BUILDING
INDIANAPOLIS

- 2 -

Mr. Carl Fisher - Continued.

have kept yourself up with this and also you have smoked much more than is your custom. While I do not believe that a moderate amount of good Scotch and good tobacco has any particular effect upon the middle aged persons elimination, yet an excess of one or both can not help interfering with the normal function of the kidney, the bowel and the skin.

(3) The prescription which I have enclosed should be continued. The first which is an iron preparation to help build up your blood should be carried on through the greater part of the winter, and the prescription which I am enclosing today is to control the pains which you are suffering in your muscles and will also help in your elimination.

I am glad to note that your blood pressure is quite normal. ⁵/₁₃₀ ²/₈₅
There is no unbalancing of your nervous system, the reflexes are all normal and considering the spirits of the past month, I am rather surprised to see you in such good condition.

Before you leave I should like to have another sample of your blood which will require only a minutes stop at the Hospital.

I want to hear from you at your convenience and I some how feel that when you get back to your old sea level haunts, that you will come into your own again very rapidly.

With very kindest regards, I am

Very sincerely yours,

Joseph

CHARLES D. HUMES.

health

Mr. Fisher, #2.

August 18, 1922.

boat out and down to you where you would have a chance of disposing of it. They do seem awfully slow about getting these jobs done. It meant so much to you to have that boat there the first of this month. Still, I suppose there is no use crying over spilled milk.

SPG
I should like to know what Goodrich has to say regarding sale of bonds on the Miami Beach Electric Company plant, equipment, etc. Please be sure not to overlook asking Goodrich about this, and if there is going to be any delay in seeing Goodrich, don't you think it would be a good idea to write him and let him make suggestions? That would give us a chance to get things under way, and without any lost time. These things always take a long while to work up, and every day that we can save may mean a lot to us, and if Goodrich can give us some pointers and let us know exactly how he wants this bond issue set up in case we are successful in floating one, it will be of assistance to him as well as to ourselves, for he certainly knows just the right parties to go to to float an issue of that kind, and that is something neither Romfh nor anybody else down here knows anything about. Romfh's stronghold is the selling of small mortgages or mortgage notes, and they have no clientele to which they can sell bonds of large amount or of this character.

If you have been able to locate the right kind of a place on Long Island, namely, that seventeen acre tract, and you are free from Hay Fever, and are sure you are going to like living there, by all means get it, because it is going to be worth a great deal to you in every way, not only because you ought to be somewhere near the center of things, i.e., New York City, but more particularly because you can avoid having Hay Fever every year. I know how essential it is that you have exercise every day. It is too bad that the water in the Sound is too cold, and that the tennis courts are always filled up. The thing for you to do is to have your own tennis courts, and get your horses down there, and get into polo and tennis. Next Summer it won't be necessary for you to spend so much time in New York, and you can have a good time with just enough business mixed in, so that neither one will be monotonous. I should like to see you do that, because it means a whole lot to you, and you have certainly gone through enough in the last few years to warrant your taking a rest and forgetting business, at least too much business, during the Summer season.

I note you still have a craving to operate property, for you say you would like to live in Long Island if you were fixed to operate. It seems to me that you can afford to take a rest during the Summer season. In a year or two, when we get this thing whipped into shape so that the income is greater than the outgo, then it will be quite time enough for you to think of getting into something up there. I don't believe all the good opportunities will have been made use of, and, as you know, you have a faculty

Number, #3.

August 18, 1922.

for nosing them out and picking up good bets that the other fellow overlooks. There isn't one person in a million that would have looked upon Miami Beach when you saw it and have done with it as you have done. So, there you are.

I am not surprised at your remark regarding the percentage of plain grafters which you have run into.

I note that Miss Collier is to remain in the office while you are West. You didn't say how long you expect to be away. I don't think you will have any difficulty in getting there, although of course I appreciate that railroad traffic is pretty well tied up now.

I think that the difference which you have noticed in the attitude of people, and which you intimate is due entirely to the strike and curtailment of manufacturing industries, etc., will be immediately relieved as soon as the railroad strike is settled. You mustn't overlook the fact that pretty strong pressure is being brought to bear on both the strikers and the railroad executives, and this can't go on very much longer. The end of it all is not far away, in my opinion.

I am sorry to learn that the Kentucky Rock Asphalt Company people are in trouble again. Most of the time they appear to be in trouble of one kind or another. I don't think that Wood being a little off in his head is entirely new. Maybe his conscience is troubling him. If it doesn't it certainly ought to.

This morning I received a letter from Cecil Fowler, returning the old canceled note, and advising me about the renewal note, the length of time it is to run, etc.

Very truly yours,

F. R. HUMPAGE.

Health

February 7th, 1923.

Mr. J. N. Gunn,
1790 Broadway,
New York City.

My dear Mr. Gunn:

Thanks for your letter of Feb. 1st. I have not had a chance to go through the copy of the resolutions of the Board of Directors of the Lincoln Highway Association, but I will try to do so tonight or tomorrow.

We are just in the midst of our busy season here and this condition will continue until about April 1st.

It is impossible for me to go North in the winter time without grave chances to my health, as I have a catarrhal condition that annoys me tremendously in the winter time, and in this climate I am entirely free from all troubles of this kind. I am telling you all of this so that it may partly explain why I have been unable to attend any of your meetings held in the winter time.

I hope sometime to have the pleasure of seeing you here at the Beach.

Very truly yours,

Carl G. Fisher.

CGF-1113

Health

Montauk, June 7th.

Dear Mr. Reed:

Dr. Nelson left a New York check for nine dollars with the Bank of North Hempstead for collection. The check had been marked "Insufficient Funds" but they promised to try to collect and would turn the money over to you. When you have time, could you drop in at the bank and see if this money has been received.

Nelson has not received his check for last week and is needing funds. If this has not gone to him, will you mail to Box 713, Montauk?

Mr. Fisher wants to pay Nelson monthly now and has okayed a bill for June for \$200.

Sincerely yours,

Health

Port Washington, Long Island.
June 12th, 1923.

Mr. Henry B. Joy,
1830 Penobscot Bldg.
Detroit, Mich.

Office Tele: Port Washington 358.

My dear Mr. Joy:

I have yours of the 1st. We are not at all thinking of changing the location of the Trask. I hope you will decide to come to the Races next year.

If you will have a short talk with Dr. Walden on heart trouble, it will not be necessary for you to go to France; especially, on account of your heart.

After fooling with about one dozen of the noted heart specialists in this country -- all of whom advised me that I had an athletic heart and must give up athletics and a lot of other bunk, I ran into Dr. Walden. I might say also that I had a liver that was causing me some trouble, and from a test of urine made by the National Bureau of Analysis I was advised that my condition was quite serious. Bright's Disease had started, with considerable deposit of albumen and also quite frequent blood casts.

I had a long talk with Dr. Walden, and to make a long story short, he entirely cured me in ten days; Without a drop of medicine. I had been following the advise of other doctors and had quit eating meats and acids, and was leaving out starchy foods -- and was slowly starving myself to death.

Dr. Walden put me on a diet of meat -- a full pound a day, and half a gallon of grape fruit juice -- and the result is really wonderful. I have lost eight pounds in weight; fell fine; urine test shows perfect; have no murmur of the heart or any liver trouble.

I don't believe that you have any more heart trouble than I had, but if you think you have heart trouble, it is worth your while to see Dr. Walden, whose address is 155 Court Street, New Haven, Conn., and you should read some of his testimonials, from some of the biggest men in this country. He can use one of mine any time he wants it.

In order to save time, since you are leaving in a few days, I am writing the Doctor and asking him to send you a set of these testimonial letters so you can look through them.

When I think of how much trouble I had, in spite of every effort I made and in spite of all the different advice I had from various physicians; then to consider how quickly I was completely cured with nature's own remedies, it makes me want to organize some sort of an association to teach people what to eat.

Sincerely yours,

Please note new summer address.

Health

Mr. Carl Fisher,

Miami Beach,

Miami, Florida

My dear Carl:

Harold Talbott tells me you have been suffering with neuritis. Now listen to me for a moment. I say "listen", because you have very strong opinions of your own, and characters just like you some times do, but most times do not, listen to advice that should be heeded. I want you to get well; first because you deserve to, and second because I want you to continue to contribute the fruits of your genius to your generation.

There's only man I know of that actually cures, and cures quickly, neuritis, and that is Dr. Hopkins at Hot Springs, Virginia. Mr. McMahon of this city took his daughter there when she was desperately ill. Mrs. Carnell, once Mrs. Frank J. Patterson, a woman of great wealth living here, was practically given up by the doctors. I went to her residence, and induced her husband to send her to Hot Springs. They had difficulty in getting her to the train. She came back in less than two months, and said that I had been the means of saving her life. -- Mrs. Cox, after her mother's death, suffered from neuritis. Dr. Hopkins cured her in a month. I am sorry I do not have his first name. There are two Dr. Hopkins there, but this is the one who specializes in neuritis.

Neuritis is a bad thing to let run on. You may imagine that you can't leave tasks in hand now, but if you follow this view, there may be a long, long absence from the job.

With every good wish, I am

Very sincerely yours,

A handwritten signature in cursive script, appearing to read "James M. Cox". The signature is written in dark ink and is positioned below the typed name.

December 22nd, 1923.

My dear Governor:

I have yours of the 15th. I have heard considerable of Dr. Hopkins, at Hot Springs, and I may go up and see him in a very short time. Just now, however, and for the past ten days, I have had a very expert masseur working on me and as a result, I have had practically no neuritis for several days....but, the next attack I have, I am going to jump on a train and start for Hot Springs.

I was up by your house this morning, and it certainly is looking fine; but both Mr. Hurley and yourself will have to keep digging after these contractors to get them out of the road in time; if you expect to arrive shortly after January 1st.

You have a lot of very beautiful trees in the yard but if you want a couple more unusually beautiful ones I will make you a present of them. However, I think you had better see the property before you decide to add more trees.

Most people here over-plant terribly in the beginning; and then they have to remove a great many trees later. In my own yard, which is only four hundred feet long, we took out fifty-six trees this year, and I cut down from the inside of the property and surrounding the property, eighty trees last year. Of course, when we put these trees in they were just small plants and it didn't look like we had very much shrubbery; but when you consider the terrific growth here of trees, like coconuts and pines, it does not pay to over-plant.

You are missing some wonderful weather here.

Yours,

Hon. James M. Cox,
Dayton, Ohio.

Dr. D. D. O'Kelley.
Miami Beach, Fla.

My dear Dr. O'Kelley:

Thanks for your telegram of the 7th. The treatment you gave me entirely cleaned up the gum trouble and my teeth are not bothering me at all, but on account of the neuritis and asthma the doctors seem to think that I should have my teeth X-rayed again.

I will be back down in Miami in about four or five weeks and hope to have time to run in and let you look me over.

Yours very truly,

CGF-mc

April 7, 1926

Mr. Carl G. Fisher,
Miami Beach,
Florida.

Dear Carl:

I am just home from Asheville and found your enclosure. From any one else this would be a surprise but you do so many unusual things that we who know you rather expect the unusual of you. Thank you so much for this and the wonderful time I had while there. I never before had anyone play 'big brother' to me and the experience was new and most delightful.

I trust that your eye continues to improve. At best it will take a long time to get rid of the floating strings. (Riley's Trained Seal.) I would advise the continuance of the sweats, say twice a week, and the drops in the eye followed by hot applications once daily. The drops may now be used full strength. I would be pleased to have a line from you concerning progress.

DR. G. S. ROW
905-906 HUME-MANSUR BLDG.
INDIANAPOLIS

April 8, 1926

Mr. Carl G. Fisher,
Miami Beach,
Florida.

Dear Carl:

I hope you may like these glasses. They are intended for general use. The small quadrant below will enable you to see clearly at close range. I think this is more convenient than raising or removing glasses as you have been doing. For continuous reading, glasses for this alone I think are better.

I wish you could arrange to be in Indianapolis sometime in the near future and let me go over your eyes. The question of glasses could then be definitely settled. I will promise not to use the needle.

Sincerely yours,

A handwritten signature in cursive script, appearing to read "G. S. Row", with a long horizontal flourish extending to the right.

-2-

DR. G. S. ROW
905-906 HUME-MANSUR BLDG.
INDIANAPOLIS

You will, in a few days, receive a pair of glasses with the small reading area at the bottom of the lenses. I had my frame, which you tried on, duplicated as it seemed to fit you very well.

Thanking you again for your uniform courtesy and kindness, I am,

Sincerely your friend,

A handwritten signature in cursive script, appearing to read "G. S. Row". The signature is written in dark ink and is positioned to the right of the typed name "Sincerely your friend,".

April 17, 1926.

Dr. G. S. Row,
906 Lume-Mansur Bldg.,
Indianapolis, Ind.

My dear Dr. Row,

Replying to your letters of the 7th and 8th:

The glasses arrived O.K. but I'm still having trouble with my eye. I can't see much improvement but I'm keeping up the treatment. I will report to you again in a short time.

Yours,

CGF*JJG.

E. C. ROMFH.
PRESIDENT

June 4, 1926.

Mr. Carl G. Fisher,
Port Washington, Long Island, N. Y.

Dear Carl:

I had thought that by now I would be in New York, but from what Capt. Spitzer tells me about the weather I am not in a hurry to get there until after the 15th of June. We are having the usual weather for us at this season of the year, and from the cracker's standpoint I like it.

I had a letter from Harold Talbott telling me about your accident, and I am very sorry to hear of it. It seems as we get along around fifty or beyond that we have continual aches and pains and accidents - in fact I wonder if it would not be a good idea to have some age at which we should be taken out and shot, like they do other animals. Ever since last year when I was in the Seaboard Air Line wreck I have had a back-ache; the doctors say that I have some arthritis, whatever that is. I had two teeth pulled, after which I drank considerable Scotch, and I seem to be much better - whether it was the pulling of the teeth or the Scotch liquor I am not prepared to say. I believe, however, that when I can get aboard the Marionette II and take a little rest, it will help me a great deal.

John Levi left Tuesday to explain the situation to you concerning the system of banks who got hold of a good quantity of Georgia paper. While I would like to hang a couple of gentlemen whom I have known for a good many years, one of whom

6/4/26

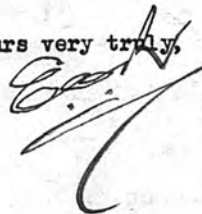

I threw out of this bank in 1905, yet it might be best to take a different course, hoping that it might do some public good.

I suggested to John that it might be a good idea for Kohlhepp to run down here for a couple of days to go over the situation with me, as it would be better to be on the ground than to wait until I come to New York.

We are "sitting pretty", and I sometimes wonder if I had not better go north and let them worry through their sweats the best they can, but I love this old town and want Miami to come back in a good orderly way.

With kind regards, I am,

Yours very truly,

ECR:DF

Mr. E. C. Romfh
The First National Bank
Miami, Florida

Dear Ed:

I have yours of the 4th. Am leaving to-day for Bermuda; then I am going to stop at Nassau and go over to Miami.

You certainly have not missed anything by not being in this part of the country. The weather here is beautiful and has a lot of "kick" to it.

My broken ribs are mended and my left eye is coming back, so I imagine I am going to be a "pall-bearer" for a lot of you "crackers" who live on egg plant.

Capt. Thompson is here and leaving with us to-day. He tells me that the Scotch you use is poor stuff. You were a "sucker" to have your teeth pulled. If you will go to Doc. Edwards, he will put an electric instrument on you that will either cure you or kill you. At any rate you will have a hell of a bill to pay.

John is leaving today on the afternoon train. I am leaving on the Shadow K at 3:20, two jumps ahead of all sheriffs and "binder boys" in this

health

Dear Carl -

In a rather indefinite way I have just learned that you had some sort of an accident to one of your eyes this year and also that you were having a lot of trouble with your stomach again - What is the straight of this story.

I want to know what I can do to help you on these points and I do not mean to tell you that absolutely anything I can do, I want to for you -

Will you advise me and if you want me to come down and for one thing with you, say so and I will plan it. Yours -
Will -

7/4/26

July 7, 1926

Mr. William G. Alexander
708 Church St.
Evanston, Illinois

Dear Will:

I have yours of the 4th.

I have been constantly laid up now for the past five months. I was struck in the eye and broke a blood vessel and one eye is in bad shape as far as vision is concerned. I think in time I will see all right. It stopped all my tennis and riding and cost me a good deal of trouble in reading.

About five weeks ago I slipped on the ladder of the engine room and fell on a cast iron cooler and broke two ribs. They are all well at this time however.

I played golf in tight shoes at Miami Beach and got some wonderful blisters that laid me up for another ten days. However I seem to be most of my troubles and am going out to play some golf this afternoon. My stomach is not giving me a great deal of trouble at this time.

I have had Scott Edwards go over me quite thoroughly and my blood checks up O. K.

Yours,

CGF:JD

November 10, 1926.

Health

Mr. W. R. Stuhler
The Firestone Tire & Rubber Co.
Akron, Ohio

Dear Mr. Stuhler:

I have yours of the 8th.

I note that Mr. Firestone has gone west with Roger's asthma. I have had trouble with Hay Fever for years; in fact my Hay Fever and Ashma trouble were my reasons for leaving Indiana and going first to Miami and then Long Island.

I find quite a relief from ashma at Montauk on the seashore, and it may be that this will do Rogers some good. We have a nice seven room houseright on the shore on the tip of the island fitted up with a couple of Chinese cooks. The house has steam heat and is organized to take care of our guests that come to Montauk during the construction of our hotels and other facilities. I would be very glad to offer this house to Rogers for a trial.

We have ten thousand acres comprising six lakes, heavy forests and a long ^{rolling} country resembling very much the hills of Scotland. We have some wonderful horse back riding and good barns, but unfortunately all of my horses have been shipped to Miami. However, Fred Post could get a couple of horses in a few days notice.

I would like to have Rogers try this place and see if it wouldn't do him a world of good.

Yours,

CGF:JD

PERSONAL

Mr. Carl G. Fisher
Miami Beach, Florida

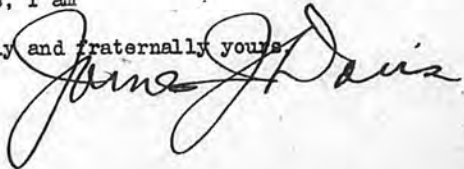

Dear Carl:

What Florida needs Carl, is the right kind of advertising. You recall that California passed through a slump, and I think they used a plan of advertising that was unique and had more to do with putting California over than any other thing I know of. It worked better than any newspaper or magazine advertising, at least, I am of the opinion that it went to the heart of the people more than the regular sort of advertising. When a state of that kind is put over in that manner, you know that it is carefully planned and skillfully executed advertising.

Carl, you have a big job ahead of you that will take all of your energy. Take good care of your health. Keep strictly to what you told me you were doing. You know many men have tried to lick that old gent, but never in the history of the world have they ever been successful at it. They may have thought so for a time, but in the end, it gets them. John L. Sullivan licked every man who stood up against him, until he was placed up against this one, and down he went. I can look back at my life now and note where a good many of my own friends went down under it, one, a very dear friend, and it cut me to the heart when he finally gave way under the fight and cashed in his chips many many years before he should have done so, all because he thought he could lick the thing that had sunk countless millions before him. You will pardon me for writing like this Carl, but I am very much interested in you and your success. This is just a heart to heart talk between two very good friends, and I know you will look at it in that spirit. I want to see you forge ahead and make a bigger success out of life, because it will mean a lot of happiness and joy to me to see you do it.

Last night my little girl Joan, the next to the youngest had her third birthday party. I wish you could have seen her. I know it would have done your heart good. We had what I call a huge evening at her birthday party. In looking at the happiness that shone from her face, I came to the conclusion that life is very much worth while. With best personal regards, I am

Cordially and fraternally yours

JJD/m

health

August 8, 1927.

Mr. Robert J. Cuddihy,
Harbor Sanitarium,
667 Madison Avenue,
New York City.

Dear Mr. Cuddihy:

Perhaps your return to Montauk would be much easier on the "Shadow K". Let me know when you are ready to go. The family could join you here at Port Washington and accompany you.

Think it might be best for you to come here to Port Washington in an ambulance where there is no question about dockage and no trouble whatever to handle you from the dock to the boat as the ambulance could drive right to the boat on our dock here. Then when you get to Montauk, an ambulance or automobile could come along-side the boat on the dock. This, I believe, would make the best general transfer and would be much easier on you.

Having had nine broken ribs, one broken ankle, a broken arm and nose, I realize what it means to be bumped around and want to help you all I can and make your trip convenient and easy. Let me hear from you and give me about a day's notice as we are making frequent trips to Montauk with people from the west and some times it is not easy for us to change our sailing date at the last moment.

Very truly yours,

GGF:T

Explanatory Key with Helpful Suggestions

For exclusive use of the subscribers to the National Bureau of Analysis

This Key explains the items on the opposite page. In each item the normal condition of health is first stated, and then the meaning of abnormal conditions is explained.

Always note carefully, any items to which we point and thus secure the full benefits of this Life-Lengthening Service.

This Bureau has no treatment to offer its subscribers. To the near-normal, however, our Helpful Suggestions, based upon the conclusions of the Bureau from years of experience in comparing and tabulating its reports to subscribers throughout the country, will prove helpful guides to the normal balance of health.

CHEMICAL EXAMINATION

1. TRANSPARENCY—Normal: Clear.

While normal urine is clear when first voided, a clear urine is not necessarily normal. It may contain Albumin or Sugar or other abnormal ingredients which can be determined by chemical examination only.

2. COLOR—Normal: Amber or Yellow.

Urine containing too much waste material is said to be concentrated and is then more highly colored.

3. SPECIFIC GRAVITY—Normal: 1.012 to 1.028 Average: 1.020.

The Specific Gravity represents the weight of the urine as compared with an equal volume of distilled water. It varies according to the amount of solids the urine contains. When above 1.028 it is overcharged with substances that are irritating to the kidneys. When persistently below 1.012 unless from the drinking of much fluid—it means that the kidneys are not functioning properly.

Helpful Suggestions: A diet balanced as to variety and quantity of food should give a specific gravity between 1.012 and 1.028. If above 1.028 eat less, especially of meats and drink freely of water. If persistently low, unless associated with casts or other evidences of disease, eat more of protein foods.

4. REACTION—Normal: Mildly Acid.

High acidity usually accompanies concentration. It does not necessarily indicate uric acid in the blood. Alkaline reaction occurs in cystitis (inflammation of the bladder) or it may result from the use of mineral waters or other alkalis.

Helpful Suggestions: High acidity may be corrected by eating less of heavy foods especially meats and drinking more water.

5. ALBUMIN—Normal: Absent.

Its presence is usually significant of some form of inflammation of the kidneys (Bright's disease). It may appear temporarily from many forms of irritation and from inflammation in the lower urinary tract. When persistently present its significance should be determined by a competent physician.

Helpful Suggestions: Do not conclude at the first appearance of a small amount of Albumin that you have Bright's disease. It is often temporary—due to some passing irritation or congestion and not necessarily evidence of kidney impairment. But it is a warning of Nature that calls for less work for the kidneys. Give Nature a chance to correct the condition by confining yourself for a time to a vegetable and liquid diet, eating very sparingly (if at all) of meats and eggs.

6. SUGAR—Normal: Absent.

Certain cells of the Pancreas manufacture an internal secretion known as insulin which is discharged into the blood and regulates the body's use of the sugar formed from the food. If this secretion is deficient the normal utilization of carbohydrates (sugar and starch) is impaired and sugar appears in the urine. All diabetics show Sugar (but all who show Sugar are not diabetics.) It occurs occasionally as a result of eating too much of sweets or from certain forms of indigestion.

Helpful Suggestions: The appearance of Sugar in the urine even in small amounts and at long intervals classifies the individual as potentially diabetic and should call for watchful care. Temporarily, at least, the sweets and starchy foods such as candies, desserts, white bread, potatoes, etc. should be eliminated from the diet. True diabetics should study food values in Carbohydrates.

7. UREA—Normal: 1.5% to 2.5% on Mixed Diet.

Urea is the most important waste product of urine. The percentage of Urea indicates the amount of nitrogenous waste excreted by the kidneys, usually increased on a meat diet and decreased on a vegetable diet. **Helpful Suggestions:** When above the normal range (1.5% to 2.5%) the urine is concentrated. This condition means too much nitrogenous food is being eaten or not enough water is being consumed to dilute the urine properly. When persistently below normal it suggests not enough nitrogenous food, or fault in nutritive processes; or that the kidneys are not working properly. See No. 9 (below) for "nitrogenous foods."

8. AMORPHOUS URATES—Normal: Some.

White Urates in excess usually occur in concentrated urine. (See No. 2.) Pink Urates suggest functional disturbance of the liver.

Helpful Suggestions: Eliminate excess of White Urates by drinking more freely of water, and eating less heartily.

9. INDICAN—Normal: A trace only.

Albuminous putrefaction in the intestines results in the formation of a chemical called Indol. In the urine it appears as Indican. It is usually caused by too much nitrogenous (albuminous) food, such as lean meats and whites of eggs. When persistently present in excess it denotes intestinal disorders that often produce auto-intoxication, introducing into the blood the fatigue poisons, lowering physical efficiency, and leading to more serious conditions. A frequent cause is constipation.

Helpful Suggestions: An excess of Indican means that the albuminous foods are undergoing putrefactive changes in the intestinal canal either from some fault in digestion and assimilation or from too long retention of food waste from constipation. Such conditions are irritating to the kidneys. Eliminate the excess of Indican by eating less of lean meats and whites of eggs and with careful attention to daily bowel movements you will do much to maintain a normal balance of health and find your physical efficiency materially increased.

10. SULPHATES (Aromatic)—Normal: Small Amounts.

An excess is usually the result of persistent constipation.

Helpful Suggestions: See suggestions under Indican.

11. BILE PIGMENTS—Normal: Absent.

They are usually due to obstruction to the outflow of Bile caused by inflammation in the stomach and small intestines or to gall stones or to tumors pressing upon the Bile ducts or to adhesions.

Helpful Suggestions: Their presence calls for attention from your physician.

12. MUCIN—Normal: A trace only.

Helpful Suggestions: An excess has significance similar to that of Cylindroids (See No. 22).

13. PHOSPHATES—Normal: Small amounts.

An excess on voiding suggests too much worry or nervous strain due to business or other cares, or nutritive disturbances.

Helpful Suggestions: An excess may be due to a predominating vegetable diet.

14. ACETONE—Normal: Minute amount.

In diabetes an excess suggests advanced stage.

15. DIACETIC ACID—Normal: Absent.

In diabetes its presence suggests advanced stage.

Helpful Suggestions: Excess in Acetone or Diacetic Acid calls for attention from your physician.

(Continued on Next Page)

Explanatory Key with Helpful Suggestions

For exclusive use of the subscribers to the National Bureau of Analysis

MICROSCOPICAL EXAMINATION

16. CASTS—Normal: None.

Casts are found in Bright's disease and congestion of the kidneys. When persistently present it is important that their significance be determined by your physician. **Helpful Suggestions:** Hyaline Casts may appear temporarily in the urine when the kidneys are congested for any reason and may disappear as the cause of congestion is removed. In men of advanced age the Hyaline Cast frequently appears without other evidences of disease and is then of little significance. When persistently present in younger people they indicate structural changes in the kidneys. Epithelial Casts or Granular Casts are evidence of more extended impairment of the kidneys. Their presence calls for attention from your physician.

17. BLOOD—Normal: None.

Its presence suggests inflammation in the urinary tract or stone in kidneys or bladder or tumor growth. A few Red Blood Cells may appear in male specimens from some passing irritation. They frequently appear in normal female specimens.

Helpful Suggestions: If persistently present the cause should be determined by your physician.

18. LEUCOCYTES (White blood cells)—Normal: Very few.

Their presence indicates an attempt on the part of Nature to avert some process of inflammation. A few may be present in practically normal specimens; more commonly so in female specimens.

Helpful Suggestions: The presence of a few scattering leucocytes without other abnormal conditions may be ignored.

19. PUS CELLS—Normal: None.

Evidence of inflammatory change in some part of the urinary tract. This condition may arise from injury, from some former inflammation or from absorption of infections from some other part of the body. When persistently present they suggest a condition that without proper treatment will slowly progress until serious disease of the prostate gland, bladder or kidneys results. Attention to this condition will often save distress in later life.

Helpful Suggestions: Pus Cells are never present in normal urine. Their presence calls for attention from your physician.

20. CRYSTALS—Normal: None.

Uric Acid Crystals are frequently the result of overindulgence in animal food. They do not necessarily mean excess of uric acid. Calcium Oxalate Crystals suggest fault in diet or nutritive disturbance. Cystin Crystals are suggestive of the presence of stone in kidneys or bladder. Triple Phosphate Crystals appear in urines undergoing ammoniacal change, usually from long standing.

Helpful Suggestions: Uric Acid Crystals may disappear with the drinking of much water and eating of less meat. Certain characteristic forms of these Crystals may be found in cases of rheumatism and gout. Calcium Oxalate Crystals may appear temporarily after much eating of fruits and vegetables rich in oxalic acid. Excessive crystalline formation of any kind, however, means fault in diet or digestion and nutrition and if the underlying cause is not corrected may lead to troubles of serious character.

21. SPERMATOZOA—Normal: None.

If found they are due to the presence of seminal fluid. **Helpful Suggestions:** The presence of Spermatozoa is usually part of a normal process and when intermittent and not associated with other findings that are abnormal they should be ignored.

22. CYLINDROIDS (False Casts) — Normal: None.

Their presence suggests some irritation that has extended to the kidneys, but does not mean structural disease of the kidneys. They are mucus casts. (See No. 24.)

Helpful Suggestions: They are caused by slight irritations in the tubules of the kidneys and are of less importance than hyaline casts. They disappear readily and do not mean actual disease.

23. BACTERIA—Normal: None.

Found in inflammatory conditions. When found in otherwise normal urine their presence may be ignored.

Helpful Suggestions: Practically all Bacteria found in otherwise normal urines are extraneous; that is, they are added to the urine after it is voided, either from the air or the vessel into which the urine is passed. When disease producing Bacteria are present in the urine as voided other evidences of disease will show in the specimen, and all conditions of the urinary tract associated with bacterial infection call for attention from your physician. The true character of bacteria can be determined only by the culture and staining process, which is not included in this service.

24. MUCUS—Normal: A trace only.

Mucus is the natural lubricant for all mucus membranes and every internal organ in the body is lined with mucus membrane.

Helpful Suggestions: When in excess it suggests some irritation in the urinary tract. Unless associated with other conditions such as many Leucocytes and many Squamous Epithelial Cells it is usually temporary and unimportant. An excess of Mucus is normal in female specimens.

25. EPITHELIAL CELLS — Normal: A few Squamous Cells.

Squamous Cells are from the surface or urethra and bladder; Spindle Cells are from deeper layers; Renal Cells are from the kidneys and may mean inflammation of the kidney structure.

Helpful Suggestions: A large excess of Epithelial Cells in urine suggests irritation or inflammation. The size, shape and character of the Cells may suggest the location from which they are derived and also, to an extent, the severity of the irritation or inflammation. Excessive deposit of Epithelial Cells is always associated with other evidences of disease. The associated conditions when in excess call for attention from your physician.

NOTES.

The late afternoon or evening specimen is most desirable for the laboratory tests, not the first in the morning.

Normal 24-hour excretion for adult, male, about 1500 C.C. or 50 fluid ounces; female, about 1350 C.C. or 45 fluid ounces.

Aug 5-

Dear Carl:

I feel darn sorry about your eye and hope the other one is not worrying you

My eye was punctured with a needle every 4 or 5 days, for about 2 1/2 years; then I thought about every thing would happen to the other one, at times it would feel mighty weak, and I would worry a little but for the last two years I have forgotten about the bad eye

The mind seems to have a lot to do with it and I feel a "helva" lot better. I have not worried about anything and try to solve then ignore any "static" that enters my mind

The bad eye is negative, the good eye is positive: Positive is good, so in thinking good it develops the good.

"Static", discord, strife and worry are negative conditions of the mind and cause much harm to the body; these conditions should not be recognized as positive.

You have always had a wonderful creating mind, highly developed, and always for universal good, with this power you

Health

1930

FIRST DAY:

- Breakfast: One-half grapefruit, Melba toast, coffee
- Lunch: One-half grapefruit, one egg, six slices cucumber, one slice Melba toast, tea or coffee.
- Dinner: Two eggs, one tomato, one-half head of lettuce, one-half grapefruit, coffee.

SECOND DAY:

- Lunch: One orange, one egg, lettuce, one slice Melba toast, tea.
- Dinner: Broiled steak (plain), one-half lettuce, one tomato, one-half grapefruit, tea or coffee.

THIRD DAY

- Lunch: One-half grapefruit, one egg, lettuce, eight slices cucumber, tea or coffee.
- Dinner: One lamb chop (trim fat off before cooking), one egg, three radishes, two olives, one-half grapefruit, lettuce, tea or coffee.

FOURTH DAY

- Lunch: Pot cheese, one tomato, one-half grapefruit, one slice Melba toast, tea or coffee.
- Dinner: Broiled steak, watercress, one-half grapefruit.

FIFTH DAY

- Lunch: Orange, one lamb chop, lettuce, tea.
- Dinner: One-half grapefruit, lettuce, one tomato, two eggs, tea.

SIXTH DAY

- Lunch: Orange, tea.
- Dinner: One poached egg, one slice Melba toast, orange, tea.

SEVENTH DAY

- Lunch: One-half grapefruit, two eggs, lettuce, one tomato, two olives, coffee.
- Dinner: Two lamb chops, six slices of cucumber, two olives, one tomato, lettuce, one-half grapefruit, tea or coffee.

EIGHTH DAY

Lunch: One broiled lamb chop, lettuce, grapefruit, coffee.

Dinner: Two eggs, plain spinach, four stalks asparagus, one-half grapefruit, toast, tea.

NINTH DAY

Lunch: One egg, one tomato, one-half grapefruit, tea.

Dinner: Any meat salad.

TENTH DAY

Lunch: One-half grapefruit, one lamb chop, lettuce, tea.

Dinner: One-half grapefruit, one lamb chop, lettuce, tea.

ELEVENTH DAY

Lunch: Cinnamon toast, tea.

Dinner: Broiled steak, celery, olives, tomato, tea.

TWELFTH DAY

Lunch: One-half lobster, crackers, grapefruit, coffee

Dinner: Two broiled lamb chops, cold slaw, tomato, one orange, three olives.

THIRTEENTH DAY

Lunch: One egg, one slice toast, grapefruit

Dinner: Broiled steak, lettuce, celery, grapefruit, coffee.

FOURTEENTH DAY

Lunch: One egg, toast, grapefruit, coffee

Dinner: Broiled steak, tomato, grapefruit, coffee.

FIFTEENTH DAY

Lunch: One egg, tomato, grapefruit, one slice toast

Dinner: Two lamb chops, one-half spoon tomato catsup, one slice toast, grapefruit.

SIXTEENTH DAY

Lunch: One egg, one tomato, grapefruit, coffee.

Dinner: Broiled steak, plain spinach, orange.

SEVENTEENTH DAY

Lunch: One chop, lettuce, grapefruit

Dinner: Broiled steak, tomato, celery, olives.

EIGHTEENTH DAY

Lunch: One egg, tomatoes, one-half grapefruit, coffee

Dinner: One broiled fish, plain spinach, one-half grapefruit

(Breakfast the same each day)

August 18, 1930.

Mr. John Oliver LaGore,
Washington, D. C.

Dear Jack:

Thanks a lot for that "All in The Racket" book; but I am a little bit ahead of you this time as I have read this book. It certainly is a dandy. I belong to the Club and get the books regularly. You will notice they leave plenty of room on the margins and they don't jam the words up together.

You have entirely too many nicks in my gold stars. Not a drink for ten days is my record and then only two gin fizzes and to bed once in a while at 8.30. I ate fourteen ears of yellow bantam corn a couple weeks ago and it got the best of me. After the third day I had a high colonic irrigation, and believe it or not, some of this corn had commenced to sprout! Seriously, if there is anything wrong with you, take yourself a high colonic irrigation.

I am sending you a picture of a little six ton Fin Whale that Captain Charlie brought in Friday. Needless to say, Steve is on the job and we have picked up several lines of publicity for Montauk. Mr. Vanderbilt had his crew out skinning the whale and will put it in his private museum.

Margaret continues to be flat on her back and while we think she is doing better it certainly is slow and some times quite discouraging to her.

I hope you and Ethel can get down soon and stay over for a couple days fishing. You know I have the "H" here and we can do very well without a fish guide. Fishing here is almost beyond belief. The "H" was out yesterday two hours and a half and brought in 58 small sea bass. Captain Thompson arrived as usual at the dock with a big sword fish, a

October 1, 1930. health

Mr. C. M. Keys,
39 Broadway,
New York City.

Dear Clem:

Everything seems to be cleaned up at Montauk and I am expecting to leave for the south between the 10th and 12th of this month. I was in New York day before yesterday and I had a severe attack of hay fever which I think comes from monoxide gasses, so that the blood ran out of my ears. I am back at Montauk feeling very good today but I am quite anxious to get away from conditions which are very distressing to me.

I am in hopes you are working forward to a plan whereby you will take over Montauk under conditions that are entirely satisfactory to yourself. I am going to ask Bob to come in and talk with you just before he leaves for the south. I hope you will be able to get out for a day or two before the 15th. I would be glad to come in and see you in New York at any time but I don't believe I can stand another day in New York --there is something in the monoxide gasses from the city streets that gives me internal explosions.

Is there any possible chance you and your wife or any of your friends would like to go south on the "K" with me and three friends, leaving the 10th, 11th, or 12th, according to weather conditions. I expect to have Jack McGorce with me and perhaps Fred Britten.

Fred Britten was here all last week and had a great time. He expects to be with us for a couple months next summer. I suppose you have already seen from the papers what he has said about Montauk.

Yours,

CGF:T

I just have your letter of the 30th and have wired you that I will be here this week-end.

health

November 21, 1931

Mr. Howard Coffin,
Sea Island Company,
Sea Island Beach, Ga.

Dear Howard:

Your letter of November 14th has chased me around the country, and arrived here at Miami Beach yesterday.

I have been here since the 5th. I had a rather tough time with asthma for about four days, but have entirely recovered, and now that I am at Miami Beach, I feel very well. I was sorry not to be with you in New York, but I just felt that I positively could not get into the city and absorb any more gases from the streets, as my hay fever and asthma I am sure, are caused from the monoxide gases from the streets.

It looks like the deal we had in progress may fall through. We completed a lot of work in the office to get this deal in shape, and fortunately the work is completed, so we will not have to do the job over again for another prospect. We have not given up hope of the deal falling through, but on the other hand, I did not have much hope of it going through and I am not terribly disappointed.

We had another good prospect who I think may be interested in the same plan offered to the Jersey people.

I came down on the Clyde Line, and did not have a chance of stopping off to see how you were doing at Sapelo Island. I did think after you got south I might drive up some day, as I am of course interested in your progress there.

A lot of people are coming into this country now. A great many of course are people who are looking for work, and a large number of people are coming who expect to live at a very low cost through the winter season. On the other hand a large number of residents are coming about thirty days earlier than usual, which is

Mr. Howard Coffin - #2

a good sign. We have rented more of our expensive cottages near our hotels than ever before at this time of the season. On the other hand, we have less positive hotel reservations, so that it is quite difficult to decide now just what the season may be.

Mr. Widener has completed, at an expense of at least one million and a half dollars, the most beautiful race track in America, and I believe it will have a very successful season. It is worth while to see this race track, so I hope you and Teddy will run down here at the first opportunity.

Building is progressing here on the Beach better than in any other spot in Florida, and of course it is miles ahead of most Northern cities with ten times our population.

Best regards,

Yours,

C. G. FISHER

Dear Fred:

Yours of the 10th. I don't believe I will be able to get north before the middle of May. I am having a great deal of trouble with rheumatism nowadays, and know if I get up there it will be much worse.

Will let you know when I expect to arrive.

Yours,

CARL G. FISHER

CGF-EM

April 24th 1933

T. E. Ringwood

Heilth

My dear Tom:

I thoroughly agree with you in your idea of turning over prospects to L'Ecluse, but the great trouble is that L'Ecluse is not on the job. He cannot afford to have a man at Montauk all the time, and when a prospect is ready to buy, somebody should be there ready to sell him. That is the worst part of our hook-up with L'Ecluse.

I never met a man that I thought more of as a real estate dealer than L'Ecluse, he is as clean as a hound's tooth, honest, and has a fine reputation, but what we should be able to do always is to make a deal with L'Ecluse to represent him, and help him make the deal, as far as commission is concerned, it would mean nothing, but I know from past experience that everything depends on time, and being able to practically conclude a deal on the spot.

I notice that you have rheumatism in both arms, now let me tell you something that helps me a lot, I wear a woolen wrist band on my arm and it really is wonderful what it does for you. I will send you one today by mail. I have a half a dozen that have been knit for me by my admiring female friends. If it does not do you any good, send it back and I will wish it on someone else who has rheumatism.

Hope to see you soon, but don't want to come up there in that rainy weather.

It looks like there might be a market for real estate this Spring, unless everything goes haywire. A lot of people who have horse sense, have found that real estate beats bonds, unless you have too much real estate. Perhaps we might get a break some day at Montauk, and if so, we will have a lot of "smoke on the ball"

Yours,

CARL G. FISHER

CGF-HM

May 13th 1933.

Mr. Albert Bromser,
126 Albertson Avenue,
Westmont, N.J.

My dear Albert:

I have yours of the 8th.

Wherever we get the first outfit built I think we will have to move it to Port Washington, because of the contact being so close to the parties we will want to talk to at Port Washington.

Another thing, it is impossible for me, on account of my hay fever and asthma to stand a railroad journey even to New York, unless an exceptional case demands it, and it is easy for you to run up to Port Washington from Philadelphia.

At Port Washington we have unusual facilities to make repairs or to make minor changes.

I have not received any further letter from Kettering, and know he has been enormously busy, as you probably know, the Electrolux and the General Electric are giving them a great run.

I am in touch with Mr. Louis Mooers, who is designing a new Solar heater for the roof unit. Am satisfied that Mooers will improve the other outfit 50%. Mooers is a fine engineer and from him, we can I believe, expect considerable, although he is now over 60 years of age and is rather slow.

If Mooers gets his heating outfit completed, he could give us the information you request from the Solar Company. I somewhat doubt if they have any engineering data that will give you satisfactory replies.

We want to sell the generating sets, and will take anywhere from \$6,000 to \$8,000 for them. I might put it this way, you can have all over \$6,000 you can get, but you will have to be very careful in pricing them if you want to make any money on it.

Mr. Albert Bremer - #2

For instance, they should bring \$8,000, which would give you \$2,000. We cannot put any guarantee on them that I know of, but we can get them some extra parts.

If you get any real inquiries on the generators, you must let us know quickly, so we won't run into anybody trying to double cross you on the purchase.

Yours,

CARL G. FISHER

CGF-HM

Jan. 7, 1938.

Dr. E. B. Maxwell,
605 Lincoln Road Building,
Miami Beach, Florida.

My dear Doc:-

I have your bill and to say that I got a shock at the size of this bill puts it mildly. It would have been cheaper by far to die.

Quite seriously, I want to tell you that the bill, in my estimation, is out of reason. I do not know how many trips you made, but I do know that you stopped in once in awhile towards the last two or three days. Well, anyway, I think the bill is out of all reason, and it was not necessary to ask Dr. Walters to come in (who also handed me a bill for \$25.00, for saying "Hello").

There is a lot of criticism about the doctors' charges down here, especially so on this Beach. I met a man some little time ago who had just had an experience of paying a doctor's bill, and he told me it would have been very much less expensive for him to have taken the train and gone back to Macon, Ga., and paid a hotel bill there, than it would be for him to meet the doctor's bill which he received here.

This is the first time I have ever kicked on a doctor's bill, although I have had several occasions to do so, but the amounts were smaller and I just paid the bill rather than to mention the matter.

Yours,

CARL G. FISHER.

CGF:AVH

EUGENE BLAKE MAXWELL, M. D.
605 LINCOLN ROAD
MIAMI BEACH, FLORIDA

January Twelfth
1 9 3 8

Mr Carl G. Fisher
Miami Beach,
Florida.

My dear Skip:-

Your letter of January 7th received and contents noted with probably greater amazement than you describe your shock on receipt of my bill for professional services.

The standard fee for house calls in greater Miami is five dollars for day calls and ten dollars for night calls. The responsibility of a case of pneumonia complicated by diabetes is far greater than the ordinary case, however in spite of this, I have never made a charge of over five dollars a call on you regardless of whether it was day or night or what type of case.

Furthermore if you will recall I have made many calls on you for which I purposely have made no charge for reasons known well by both of us.

In this particular bill you may not recall but I was called to see you four times prior to the onset of the pneumonia for your bowel trouble and after you were up and about you had a second bowel attack which required my services. These calls deducted from the total bill make my charges for the care of you during the pneumonia seem in my opinion very moderate.

If you will recall that the services were rendered over a period of three weeks I think you will agree that I have been more than fair in my charges.

Sincerely,

Eugene B. Maxwell

and for the past month
I have been driving into
and back from Chicago
almost daily - 200 miles

Then I would set to come down to
Miami if the hurricane hit - it didn't
as you are well aware so I planned
on leaving for Miami last week
end - my wife and children remaining
up here & well the children's maid
gave notice that she was leaving
to get married - she left today -
we are closing up this summer
home and moving into Chicago in
a week - which means work and
with no maid mother and my wife
refused to let me come - it is a large
place and with only three servants
I must let them close up while
I tend to the children -

I would like very much

to get down to Miami
soon - an see you - really
I am very homesick for
that place and you.

So - if for any reason
you should send an
urgent call for me I
may be able to get a
good argument to leave
an -

How is the camp
coming - I spoke to
Dr Alexander a week
ago - and he said he
would write you -

I hope Emma and Willie have
been taking good care of you -

I saw Les Cassillo in a movie
in a kick town up here - "The Blockade"
I thought of you & he was good -

Dont forget if you send an S.O.S.
for me I will fight to come down -
I hope to get there otherwise by
roundabout 1 or 2 -

Tell Doc White to get in touch
with me if you will and tell me
the dope -

Good Luck skipper and keep
smiling - I want to see you badly
and soon - you're a real man and
a good sport - yours
Doc -

LAKE BEULAH
WISCONSIN

I am to have lunch
with him in the near
future - I say you
are able to make the
trip back and forth
very well - I miss
those trips and hope
we can make them again
- I will never forget
them - you sleep beauti-
fully with a cigar in
your mouth

JULY 1938

M. BAR M. RANCH
KETCHUM, IDAHO
(USE WESTERN UNION FOR TELEGRAMS)

Dear Skip:

I meant to send you these pictures the other day but forgot them. You can read about them on the back.

We have all been very busy and working at all things. Building a well and working on a cabin and cleaning the ground about and building a fence for a pasture. There were no fences at all and we can not keep out stock or keep our horses in. Now we have to walk about two miles to get them.

How are you and why don't you write to us. Dan says the weather there is awful and I am so sorry and suppose you are thinking of taking off for Montauk. I am sending you a clipping out of a N.Y. paper about Montauk and our own Alfred Barton.

How is Dan? and how is your fishing camp getting along? We are all bitten up with mosquitoes and the horse flies are dreadful but they say they only last until the 1st. of August. They are so bad it is no fun to ride. The country is very beautiful though now and the mountains all covered with flowers. They have never been so green and that because of the great amount of rain. We are looking forward to having Dan here and he will get a good rest.

We have no dog which is very sad and I wish we had Hay but we will have to get one. A collie I guess.

How is Emma and give her our best wishes.

Micky sends her love to you and says to tell you she is very stiff from chinking a cabin with cement all day yesterday.

Steve Hannagan is coming out in August for the Sun Valley Rodeo which is the 12, 13, and 14th. of August. Sun Valley is only 60 miles away over a mountain pass and our nearest town. In fact the nearest railroad. We have to truck everything in including lumber, and all freight. I went to town in a truck last Monday and it almost killed me. The bumps in the road and we brought back a lot of lumber and etc.

Florence

Thursday -

Remember to Emma

JULY, 1938

M. BAR M. RANCH
KETCHUM, IDAHO
(USE WESTERN UNION FOR TELEGRAMS)

Thursday 14th.

Dear Skip;

Gosh I wish we had you out here for there is certainly a lot of "building up" to be done. You would love it for it is real pioneering.

The weather is lovely and the country is very beautiful because they have had a lot of rain. There is still a lot of ~~***in*~~ snow on the mountains.

The boys are so happy to be here and go running all over the place. We have very good horses to ride for the summer. Danny and ~~the boys are~~ Michael are so thrilled over the saddle you gave them.

Have you seen Dan much? He says the weather is awful and full of mosquitoes. There are horse flies out here now and mosquitoes too.

Could you get your self to gether and either write to us from the office or have Emma write to us. The boys loved being with you and go about quoting you. I hope you were careful what you told them. They could learn a lot listening to an old cowboy like you. How is "Hay"? Wish I had him out here out of that heat. It is freezing here at night.

When are you going to Montauk? I had a letter from Alfred Barton and he says he is liking Montauk a lot and is looking forward to a big season.

I wish you could see this tiny town where we have to go for mail. It has a population of 25 and is a real western town with nothing but bars and gambling clubs. The main one is called the "Rod and Gun club" and is owned by a man whose name is "Slavey Weary" and that is his real name and he has about 4 places here in this part of the state and never takes a drink. He has a place in Sun Valley and has been there for years. Well some eastern men came out and built a casino for the trade from Sun Valley and put about \$100,000.00 and did "poorly." But this old native place built like a cabin did a riproaring business. He runs a courtesy car from Sun Valley to Ketchum, 1 mile away and gets all of the trade. The easterners like the real atmosphere. They play roulette and everything right in the open all day and night. 10 chips if you like.

The boys join me in sending you our best love and do write. Hope you are feeling better.

Florence

July 19, 1938.

Mrs. Daniel J. Mahoney,
H. Bar M. Ranch,
Ketchum, Idaho.

Dear Florence:-

I have yours of the 14th and glad to hear
from you.

Certainly your letter explains what a lot of
people understand (and a great many do not understand) -
that personality is worth a lot more in any kind of business
than signs and silver dollars put in a floor.

I bet you haven't let the boys mark that saddle
in true cowboy fashion.

We are having lovely weather here, although it
is rather hot for about four hours in the middle of the day.

Regards.

Yours,

CGF:AVM

CARL G. FISHER.

July 25, 1938.

Metropolitan Life Insurance Company,
New York, N. Y.

Gentlemen-

I note your advertisement in Collier's of July
the 15th.

I would like to have some information regarding
your rates for insurance for a man with diabetes.

I have been taking Insulin and have very good
reports as far as my kidneys are concerned, but I am now
having some liver trouble, making it necessary to be tapped
about every fifteen or twenty days, letting off a surplus
of liquid from my stomach.

Do you have a clause covering this type of patient,
and what are your rates? I am 64 years old.

Yours very truly,

GCP:AVH

CARL G. FISHER.

DR. WILLIAM G. ALEXANDER
1501 HINMAN AVENUE
EVANSTON, ILLINOIS

July 8 1938

Dear Margaret:-

I find that I will be in the neighborhood of Washington some time in the period between the first and tenth of August and I am wondering where Carl will be at that time. Will he remain in Miami this summer or will he come north. I thought that if he were in the north I would try to get to see him and go over things with him. I do not know that I could suggest a thing that would help out but if I could I would be very happy to do so. I recently had a letter from him and I wrote at some length but a letter is never so satisfactory as a view of things. I am afraid there is no definite plan that will relieve him permanently. I am awfully sorry and would be more than happy to help out. When I think how many things have happened to him and how when the sun went under the cloud all those shadows that used to be hanging onto him quietly disappeared, it makes me boil. I remember the time I came to see Aunt Ida how many of them were helping him spend his money and live off him and I expect that most of them are elsewhere now. I wish you would take a minute or two to tell me about him and where he will be at that time. I note that his letter came from Miami and not from the Beach. Is he staying there ?

I hope this finds you well and enjoying the breezes off the ocean these warm days.

Edna joins me in love.

July, 8, 1938.

July 19, 1933.

Dr. Frank B. Veris,
C/o Mr. August Kochs,
Lake Beulah, Wisconsin.

My dear Doctor Veris:-

Enclosed find copy of a letter I have written to my cousin, Dr. Wm. G. Alexander of Evanston, Illinois. If you get a chance, call him up.

"Salurgin" is a new one on me. What is it? If it interferes with eating ham and eggs, I don't know what I am going to do - the information will make me sad and do me no particular good.

Regards.

Yours,

G.G.F.:

CARL G. FISHER.

July 28, 1938.

Mrs. Daniel J. Mahoney,
M. Bar M. Ranch,
Ketchum, Idaho.

Dear Florence:-

It is good to hear from you, and the snapshots
are quite good for an amateur.

That is certainly a wonderful life for the
children.

We continue to have lovely weather here.

I am dragging along slowly with the fishing camp.
In other words, the budget calls for only so much. I am getting
ready to turn it over to a committee, who will have to get out
and get some members to build the club house. This I expect
to do next week.

Yours,

GCP:AVM

M. BAR M. RANCH
KETCHUM, IDAHO
(USE WESTERN UNION FOR TELEGRAMS)

38
Tuesday, Aug. 2nd.

Dear Skipper;

It was nice having your letter and next time do not be so tight with your conversation. I am so sorry we could not hear you on the telephone last night but these forest lines are pretty bad for long distance telephoning. I could scarcely hear a word Dan said. We are looking forward to seeing him this week end.

Wish you were here for we have all been gathering stones for a fire place and have been working on it all week. We will try it tonight for the first time. It is very cold here at night and a fire certainly feels good. This is quite a place and if we suddenly get guests we have to rush about and make up a bed or put the children in sleeping bags, in a tent. They love it though. The boys both have new horses and are so thrilled with them we almost have them in the house for meals. Both are little grey mares and very cute and so gentle but very fast. You would have died at us buying one of them. It is the only one we have ever bought from anyone except a neighbor whom we know very well. Well the man was so funny and an awful liar. He swore a lot too. Anyway I had him sign a paper that when the horse got rested up he would not buck, and if he did he has to take him back. I will send you a picture of them as soon as I can get one.

I did not send the saddle out here that you gave the boys for they could not use it here this summer and I was afraid to send it. They only ride western saddles out here but in school they have to ride English ones so I am having it sent there and there is a swell leather place there and I will go and stand there while they mark it so they can not make any mistakes. I wish I had that bridle you had there though for myself for I have a horse that is hard to hold, they used to race her in relay races in rodeos. She is nice but I have to get a strong bit.

The boys send you their best and do write them a note. I hope the weather stays good for you and I know the middle of the day is hot. That is not bad though if the rain does not get too much. What do you hear from Margaret and are you going to Montauk? Best love to you and do write.

Florence M.

B.
It has frosted here several nights lately, and there is still snow in the mountains.

We went on a long pack trip the other day and the cow-boy who took us, aged 26, had a heart attack the next day. We are all doing nicely though but got a bit stiff.

The big Sun Valley rodeo is the middle of this month and we are all looking forward to that.

We went over to Charles Crum's place the other night for dinner and had a very good one. He is quite well again, you know last summer he was in a brace and had been very ill with a broken back. He has a very beautiful spot here but no guests. I will send you one of his ~~folders~~ folders. It is only about 12 miles from here.

Jm

Remember us to Emma. Wish I had some of her shad roe cake. I made a big pan of chili yesterday and it is good.

M. BAR M. RANCH
KETCHUM, IDAHO
(USE WESTERN UNION FOR TELEGRAMS)

Dear Skip;

Hope you have missed us: Well the excitement around here has been something unbelievable what with Dan here and we all went down to Sun Valley for the Rodeo last week end. It was fun and quite a show and we stayed for three days. Rodeos are like eating popcorn, a little contagious. The first day I was so scared everytime a wild bronc rider came out and then the third day it seemed I could ride one and I wondered why they did not buck more. Believe it or not it was so cold the second day that we had all of the clothes we owned on. Well when we got home it is many degrees colder here and it has been freezing ev ry night. Ice is on the pump every morning. But boy how we sleep.

To get back to the Rodeo, Steve looks swell and had just got home from Mexico. He came out with Mr. Harri-man, Averill, who is very nice. I suppose you know him. He did a good job at Sun Valley and it is a very cute place but we were glad to get home.

Our ranch here is really taking form and we got a pasture built now and a barn on the way and three new "Johns" or Chic Sales if you prefer. Now we are working on getting a new fence all around the ranch so the neighbors cattle can not eat our pasture. I suppose no ranch was ever sold that had a fence. I can understand now why you buy a fence and not a ranch. The price of one that will stand up through the snows in the winter is something to make you shudder. I always thought you could buy fences from a hardware store by the yard and that people just put them up for fun. Exercise to you. Well now I have seen the light and if anyone ever asks me about my worldly goods I will have to put the fence first.

I do wish you could see the boys ride and they are so thrilled over their own horses. Dan is riding a very nice Buck skin and he has practically worn out the pants you gave him, the V $\frac{1}{2}$ in the back and all. He even wears cowboy boots and is having such fun.

This cold weather puts a bit of a crimp in our enjoy-ing our daily bath for the water is so cold you can feel nothing for hours afterward. Dan and Paul built a dam and now we have a swimming place in the front yard when you can get the ice off the top.

M. BAR M. RANCH
KETCHUM, IDAHO
(USE WESTERN UNION FOR TELEGRAMS)

I do not know if you went to Montauk or not but from the papers I think it was almost as hot there as in Miami. Do hurry and write to us.

Dan bought himself a second hand saddle and it keeps hm in the saddle pretty well. I do wish you could be here for you would have the time of your life. I will tell you all about it when I get home.

Tomorrow we are going to a picnic, take a pack horse and our lunch and go to a look out near here. The boys stay in them all summer with out any one to relieve them and of course they are employed by the Forest to look out for fires. When you get to one of them it is a glass house on the top of the highest mountain and you can see for miles around. They have to pack up all of their provisions and etc. It is due to them we have our forest line telephone. Their only recreation is gossiping over the tel. at night and they can ring each other and talk for hours.

Dinner is almost ready and so will say good night and we love your letters But hurry and write again.

The boys and Dan join me in sending love to you.

Florence

Regards to Emma and give Hay a bone for me.

*Wednesday
Aug 18-*

METROPOLITAN LIFE INSURANCE COMPANY

NEW YORK CITY

CHARLES L. CHRISTIERNIN, M. D.
Medical Director

August 3, 1938

Mr. Carl G. Fisher
C/o Carl G. Fisher Corporation
Miami Beach, Florida

My dear Mr. Fisher:

This will acknowledge the receipt of your letter of July 25th, concerning the subject of Diabetes. We are enclosing a copy of our booklet entitled "Diabetes".

Our advertisement on the subject of Diabetes was in no sense intended to solicit life insurance. Its sole purpose was to advise diabetics, and those interested in their welfare, that through the use of insulin remarkable results have been obtained, that it is possible not only to maintain life but that life could be active, happy and contented, and, moreover, that many unnecessary deaths could be avoided. It also urged careful medical supervision and obedience to the doctor's directions. Unfortunately insulin has not been in use long enough to enable us to determine whether normal life expectancy can be achieved in a large number of cases; time alone will tell that. You will recall the sentence, referring to the value of insulin, "It is now so dependable that many doctors feel justified in promising adult diabetic patients almost as long a life with the disease as without it." If you will re-read the advertisement you will recognize that it is a health and welfare statement and nothing else.

The person who must take his insulin regularly still has diabetes. The deficiency of a normal amount of insulin is made up through hypodermic injection. Until sufficient time has passed to enable careful observation of a great many individuals, it is not likely that Life Insurance Companies will be prepared to issue either standard or substandard policies to applicants for life insurance who have diabetes.

Yours very truly,

CLG-HC

MEDICAL DIRECTOR

August 11, 1938.

Dr. Frank B. Voris,
C/o Mr. August Kochs,
Lake Beulah, Wisconsin.

Dear Doc:-

I should have written you several days ago, but I really have not been feeling any too hot for a marathon, and I have had a lot of other work to do.

I was tapped last Friday - 20½ pounds. The new opening sealed up immediately, but she "busted" open on me day before yesterday - almost blew my suspenders off. It has sealed up again this morning and I am feeling pretty fair. I am up to 190 pounds again.

From Friday evening until Thursday noon, I gained 10 pounds - just about the same as last time.

I have been down to Key Largo and things are coming along slowly there. The dock should be finished Saturday of this week. I am leaving here Saturday for Key Largo.

We are having wonderful weather here. I know it is much better than you are having in Wisconsin, because I do read the papers.

I bought me an almanac and I am reading the stars now, to see if there is any connection with my star and these frequent eruptions. I haven't found anything yet in the almanac that is worth while. It seems to be a continuous advertisement for some sort of pills.

Best regards.

Yours,

CGF:AVM

CARL G. FISHER.

CARL G. FISHER CORPORATION
MIAMI BEACH, FLORIDA
U. S. A.

August 18, 1938.

Mrs. Margaret C. Fisher,
C/o St. Moritz Hotel,
50 Central Park South,
New York, N. Y.

Dear Margaret:-

I received your two telegrams, the last one of which came in today. I deferred wiring or answering your first telegram because I thought I would be able to give you more definite information about Carl's condition if I waited until after I had an opportunity to consult with the Doctors and also see how he reacted from the last tapping, which he had last Tuesday.

I spent most of last evening with him - was at the house until about 11:45. It is my opinion that he has not reacted as strongly or as favorably from this last tapping operation as he has from previous ones. In fact, with but very few exceptions, he hasn't been out of bed since he returned from the hospital Tuesday. He seems more languid and more willing to remain at home and in bed. Of course, you will understand from the above that he hasn't made any attempt to come to the office - in fact, he called me on the phone today and said that he didn't feel well enough to come down. Heretofore, as you know, he has on occasions, on the day following his tapping, felt able and strong enough - at least, has had the inclination - to take a trip to Key Largo. Last night he told me that he didn't know whether he would be able to make the trip to Key Largo this coming Saturday.

All of which indicates to me that his vitality isn't so strong as it has been heretofore.

He has written you from time to time about what beautiful weather we were having here, but last night, even at his house, there was no outside breeze and it was very humid. Of course he gets some relief from having fans going in his room. However, I don't think the kind of weather we are having here and remaining in this climate all summer is good for him - it has a tendency, of course, to decrease his vitality. On the other hand, it would undoubtedly be unwise for him to make any attempt to leave here, because if anything should happen, he could not obtain the same quick medical attention and assistance that he is now getting; and he does not seem to have any particular desire to leave here.

Now, as to what the Doctors say (and of course you will be careful, when writing or talking with Carl, not to mention that I am keeping close tab on his condition, because he dislikes my, or anybody else, taking any "paternal" interest in his condition):

The Doctors tell me this (and, by the way, he now has another Doctor - a Doctor White who is taking Doctor Voris' place, because Doctor Voris is away on his vacation): that the thing which is holding Carl up is his heart. They say that he has an exceptionally strong heart, and that so long as it functions

as it is now functioning, and there is no let-down in that respect, it is absolutely impossible to determine how long he may continue as he is. If his heart should start to go back on him and in any respect weaken, then it would hasten matters and his condition would then become more or less critical.

In this last tapping operation they drained off 21 pounds of fluid. That brought his weight down from 199 to 178. That is pretty quick and rather a strenuous reduction in weight. That means that all the muscles of his abdomen, and all of the organs which have been pressed out of shape and condition because of this accumulation of fluid, immediately try to return to their normal shape and condition.

I discussed with Dr. White the desirability of having these operations a little more frequent, rather than to allow his abdomen to become distended and his other organs compressed to the extent they are when so much fluid is permitted to accumulate.

Dr. White tells me that he proposes from now on to have these drainage operations a little more frequent so as to correct that condition. He agrees that it is not so good to permit the fluid to accumulate to such an extent as has occurred in these last instances. On the other hand, I understand they have heretofore drained off as much fluid and he has been distended as much as he was on this last occasion.

They have also measured him for a surgical belt - the idea being to relieve the pressure on the walls of his abdomen and so that the belt will carry some of the weight which heretofore has been carried in a natural way, and which has caused the abdomen to be distended to the extent that it has. There are one or two other reasons, which I cannot very well write about, which will be improved by the use of the surgical belt.

Now, I don't want you to get the impression from what I have written that there is any immediate danger of a break-down, or that conditions are much worse than they have been heretofore. Of course we all know that what is happening cannot go on forever - in other words, that it must of necessity shorten his life expectancy to some extent. I asked particularly if they could give me any idea as to what, if anything, might happen and when. Their answer is that there is no way to determine whether it will be one month, three months, six months, or a year. It can be any one of the periods. But I did gain the impression that if these drainage operations were more frequent, it would reduce the pressure - both outward and inward pressures - and cause him less discomfort, and that there was no added danger by shortening the intervals between drainage operations by two or three days; that if his heart continues as strong as it is now, there is no immediate danger and that he might easily continue to remain approximately "as is", provided his heart stood up. In other words, from what they tell me, it seems that we must consider that his heart is in reality the determining factor as to what happens.

Of course, it is very definitely determined that there is no cure and that nothing, other than what is being done, can be done to help him. The only thing for us to do is to do whatever we can to make things as easy for him as possible, and trust that with his excellent physique, stamina, and ability to come back (which he has so many times exhibited), he will be with us for a long time yet.

Mrs. Margaret C. Fisher — 3.

I have tried to give you a true picture of just what the conditions are, and I don't want you to get the impression that conditions are any worse than they really are, or that there is any immediate danger of anything happening.

I have had occasion, within the last two or three days, to assist Clements in getting some of ~~the~~ loan matters straightened out, and have to secure from the Bay Shore Company a new deed to you for the property, and a corrected deed in connection with the 10 feet that you conveyed to Lee Appleget. The Title Examiner does not like the description in the deed conveying the 10 feet to Lee Appleget and wants a "metes and bounds" description instead of having the 10 feet described as was described in the deed given to Lee.

I am wiring you tonight, advising that I am writing you; which letter will go airmail tomorrow. Sorry I cannot get it out in tonight's mail, but everybody is just loaded with work, and it is now after 5 o'clock.

I am sorry to learn that you are not feeling well and that you had to go to Dr. Edwards. Hope the treatments will prove very beneficial and that you will be able to go out to your Mother's home in Ohio on Monday, as planned.

Sincerely,

F. R. Humpage.

OLD DEERFIELD BOND

WARRANT

Sept. 6, 1938.

Dr. Frank B. Voris,
C/o Mr. August Kochs,
Lake Beulah, Wisconsin.

Dear Doctor Voris-

Feeling fine between punctures. Will go again tomorrow, which will make six days this time. It was six days last time.

I am going to see the Doctor tomorrow and see if he can punch the hole he will use tomorrow, and then punch the one that I will need a week from tomorrow.

Finally got a belt made by a shoemaker - my own design, not patentable but very practical.

The one I bought took two or three nurses and the chauffeur and myself to adjust the buckles, side straps and knee boots that went with it.

If you know of a real fat man, or lady, who needs an article of this kind and cannot afford to buy one, let me know and I will give him (or her) this one that I have. It is designed for an abnormal abdominal development, to be kept in place by a semi-straight jacket arrangement, - only practical to put it on and never take it off, and used in the Arctic Zone only for comfort. (it is hotter than the hinges of Hell - I mean the belt.)

Beautiful weather here. When are you coming back?

Yours,

CGF:AVM

GARL G. FISHER.

Sept. 9, 1938.

Mrs. Daniel J. Mahoney,
H. Bar H. Ranch,
Ketchum, Idaho.

Dear Florence:-

I have just gotten down to your letter of August 2nd.

I have been in and out of the hospital every six days, and I have just had so much other stuff to handle that I couldn't get my mind on the subject of letter writing.

I have had a new corset made that has enough lacings, straps, buckles, belly-bands, suspenders to hold it up, patented adjustable ventilator for hot and cold weather, water-proof protection, and a lot of other things. It takes most of the morning to get it on, and most of the evening to get it off.

I had to get it made under my own engineering plan by a shoemaker. I got fitted for this thing by more people and more mechanics and make-up artists than Garbo ever saw.

Dan has been here a couple of days, but I haven't heard from the big bum.

Give the kids my love and tell them I received their letter O.K.

I had been expecting you back by this time.

Yours,

CGF:AVM

CARL G. FISHER.

Sept. 20, 1933.

Dr. Frank B. Voris,
C/o Mr. August Kochs,
Lake Beulah, Wisconsin.

Dear Doc:-

I am getting along very good.

I have my harness all adjustable now so that
I can get into it quicker than a fireman can get into a
helmet.

How much news to write about. I am just wonder-
ing when you are coming down.

Yours,

CGF:AVM

CARL G. FISHER.

LAKE BEULAH

Skipper :-

I'm ashamed
of myself for not having
written before - its one
of those things that you
will put off from day to
day - my intentions were
good but not my pen -

Tell me every thing
- How do you feel when
were you tapped last -
how much did they get

Saw do you like Dr White - how
is the club at Key Largo getting
along -

I called Dr Alexander when I
said I would but he has gone on
a vacation and won't be home until
Sept 1st - We have used salvarsan
to no avail - it would only make
use lose 2 lbs -

I left at 3.30 A.M. on Monday
if you recall and arrived in Chicago
the next day at 8 A.M. and up here at
11 A.M. which is 100 miles up into Wis
-consin not bad. I tried to sleep
in Mont Eagle-Tenn and couldn't so
I got up and drove on up.
Everyone was in perfect health

up here -

My wife + I plan
on going up to the Grand
Hotel at Mackinac
Island for 2 weeks - we
leave Friday -

With best of luck
and hello to all - Emma
Bill - the dog - I got a
card from Mrs Mahoney -
asking about you - Write
me when you feel up to
it and have time - I'll
be seeing you in Oct
Yours
Frank B Van M

New Address

1527 No. Dearborn

LAKE BEULAH
WISCONSIN

Chicago
Illinois

Dear Skipper: -

- it's been so long since ^{gosh} I've written that you must have given up for dead -

I had planned on leaving here the 19th of Oct. But my wife became ill and finally yesterday they removed an impacted

wisdom tooth - it was quite a big
job and we are now suffering -
however I will leave here on the
7th or 8th - in 10 days - as soon as the
dentist tells her to go - I will be in
Miami Beach on the 12th - so prepare
to go to the Key Largo club as soon after
as you feel like it -

The weather has been grand up
here - warm and sunshiny - I have
played golf several times but most
of the time has been taken up with
going to the "Loop" shopping etc -
for a vacation I surely have been
busy -

Tell me the latest statistics
as to weight - time - fluid and
all the gossip to date of Emma better

treat you ~~right~~ or
else -

Tell the Mahoney's hello
and tell Mrs Mrs I'm sorry
I couldn't write her in
answer to her post card -
I going to try and find
a good piece of porcelain
for her ~~for~~ I've looked and
it is scarce - so I may
fail but will try again
I didn't even get to see
a word series game -

I'll say good bye - and
keep up the chin I'll be
seeing you soon
Dac

October 4, 1938.

Dr. Frank B. Voris,
C/o Mr. August Kochs,
Lake Beulah, Wisconsin.

Dear Doc:-

When do you expect to get back here?

Doctor White bid me good-bye this morning, with general good wishes on both sides.

Doctor Panettiere is going to look after me while Doctor White is gone, if you don't arrive. However, as long as I have to be pushed around, out and sewed up, etc., I would rather you would do it,

Now that you have seen the football game, I suppose you are about ready to come South.

We are having wonderful weather and it looks like we are over any hot spells or any other trouble for the balance of the season.

Yours,

CGF:AVM

CARL G. FISHER.

October 5, 1938.

Dr. Frank B. Voris,
R. R. #1,
Lake Beulah, Wisconsin.

Dear Doc:-

I have yours of no date. That is a good plan - if you are married, don't put dates on anything you sign.

Dr. White left yesterday, and I am feeling fine although I am picking up two pounds a day. But I am feeling fine and I am hungry all the time.

I have lost so much weight around my neck and shoulders that I look like a starved turkey, but I have increased on my abdomen.

We are having really wonderful weather here. I had the fire burning last night and I expect to have it burning again tonight.

We are coming along slow but sure with the fishing club.

We have a lot of good theaters down here now, and commencing this next week we are going to have some good football. The hot dog stands have disposed of all their old stock, and during the season the peanut stands got rid of their soggy peanuts; so that there should be a general improvement in business next week.

Dr. White told me that Dr. Panettiere would take care of me until you get down. Expect I will have to go up to the hospital about Sunday and have another tapping.

I drove by your place the other day and saw that it was all right, except it needed a man's touch for a few days. You can use this for an excuse if you wish to, but I wouldn't do it if I were you. I have noticed your alibis to me are not entirely opaque.

I wrote Leo Carrillo an insulting letter about his "City Streets" show. He sent me a long telegram and I know you will get a kick out of reading it. I asked him to loan me a false mustache so that I could look like Hitler - a lot of people I want to bluff and push around down here, and I think I need a mustache like Hitler's, and I want to learn to stick out my jaw like Mussolini. I have a lot of old tennis medals and bicycle medals that I can shine up, and with a couple of bathrobe cords around my neck, to take the place of chicken guts, I believe I can make a very imposing figure, to speak before the Boys Club.

Best regards.

Yours,

GPF:AVM

CARL G. FISHER.

October 25, 1938.

Dr. Frank B. Voris,
R. R. #1,
Lake Beulah, Wisconsin.

Dear Doc:-

Are you coming down here this winter, or have you given up your practice?

I see a lot of cripples running around on the street, and they are taking them off the trains, as usual, in wheel chairs.

If you had a good runner over at the Depot, I am sure you could dig up a lot of new business.

Was just down to Key Largo. The mosquitoes and sand flies have all left. A new ant has appeared, which they call a "Texas Whip-poorwill". Antidote for even one bite is at least four fingers of Scotch, with a chaser of Zonite inside and outside.

Regards.

Yours,

COP:AVM

CARL G. FISHER.

November 7, 1938.

Mr. LaFayette Page, Jr.,
60 East 42nd Street,
New York, N. Y.

Dear Lafes-

What veterinary colleges is your brother associated with? I understand he makes a specialty of livers and lights, and general internals. My liver don't work.

The proper diagnosis of my case is that I feel fine and am in very good health - all blood tests, urine tests, etc., are right up to the standard, but liquids I cannot handle, and every six days I have to go to the hospital and they take out between 18 and 19 pounds.

This only takes an hour and I feel very well after the job is over.

Is there anything new in treatment of liver troubles of this kind? Of course, you don't know anything about livers, but you can ask your brother.

Why don't you run down and I will talk to you about some insurance - on livers only. I have no property to insure.

Yours,

CCF:AVH

Dear C. G.,

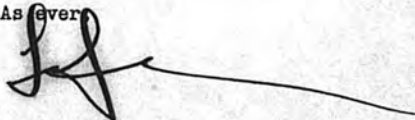

I am enclosing a copy of a letter from Irvine which pretty much explains itself. The reason that I have not answered your letter sooner is the fact that I have been waiting to hear from him.

If there is anything more you would like to have me do I shall be only too glad to do it.

I certainly hope I will be able to work out some way to get down to Florida as I haven't been down there for such a long time.

Best regards and hope to hear your reaction to the letter.

As ever

THOMAS J. PANCOAST

MIAMI BEACH, FLORIDA

7th July 1939

Dear Carl:

Next Thursday, July 13th, 1939,
will be the 19th Anniversary of the Miami Beach
Chamber of Commerce, and I am inviting a few
friends to meet with me on that day for lunch
at the Pancoast Hotel, 12:15 P. M. I would
feel honored to have you as my guest.

Sincerely,

Tom

Thos. J. Pancoast

R.S.V.P.

Mr. Carl G. Fisher,
927 - 41st Street,
Miami Beach, Florida.

July 10, 1939.

Dear Tom:-

Thanks for that invitation to a swell luncheon at the
Fancoast Hotel on the 15th.

You fellows at these luncheon parties live too high for
me. I am on a diet, mostly of pretzels and bird seed, and some
of these I have to take with a high pressure gun; so, I couldn't
possibly enjoy the luncheon and I know you wouldn't have any fun
out of me - but, just the same, you all have my best wishes.

Yours,

CARL G. FISHER.

P.S.—

If you are going to sneak in any young lobster (which I
know is out of season), save me a piece and I will get
it at the office later in the afternoon.

C.G.F.

Mr. Thos. J. Fancoast,
927 West 41st Street,
Miami Beach, Florida.

THOMAS J. PANCOAST
MIAMI BEACH, FLORIDA

14th July 1939

Dear Carl:

Of all the people who attended the Birthday luncheon yesterday at the Pancoast Hotel, I felt more honored by having you present than anyone else. I know as a rule you shy away from functions of this kind and that is why I feel so deeply appreciative of your presence.

I hope you did not mind the little joke we played on you, for I know everyone present enjoyed it, and that you did not feel any bad affects from the celebration.

Please accept my heartfelt appreciation, and with best wishes and kindest personal regards, I am

Sincerely,

Thos. J. Pancoast

Mr. Carl G. Fisher,
927 West 41st Street,
Miami Beach, Florida.

MANUFACTURERS OF
"WONDER" BELTS
AND BRACES

AS TO OUR RESPONSIBILITY
We refer to your own bank
. . . also Dun and Bradstreet or
any Publisher of a National Magazine
carrying our advertising. The
fulfillment of all claims is guaranteed
by all publishers as well as
by ourselves.

Dear Sir:

Frankly, I'm worried.

Two months ago we received from you an inquiry about the Weil Health Belt. We mailed you a folder telling all about this remarkable reducing belt, and giving you the good news that we had just reduced the price from \$9 to \$6.50.

But . . . we haven't yet had your order!

We know you must be overweight or you wouldn't have asked about the Weil Belt in the first place.

We know you can't dislike any feature of the belt because it is so simple, so comfortable, so thoroughly efficient and result-getting that it would be a joy to wear.

And we know it can't be a matter of price, because the increased energy and pep which results from a few days wearing of the Weil Health Belt saves you, in a short time, the price of the Belt itself. You have the ambition and the energy to do things which you used to pay to have done. Your improved appearance and more forceful attack on business problems will surely add to your income, so it can't be the price.

Perhaps those excess pounds of flesh have already begun to sap your vitality and you just never got up the energy to send in your order. We have known that to happen many times before. If that is the case, don't you see man, that you need a Weil Health Belt NOW? You haven't any time to lose before you start getting rid of that ambition-killing fat!

You'd set up a whale of a howl if you had to carry around a thirty-pound suitcase strapped to your waist. Then why put up with a paunch? It's the same thing!

Remember, you don't risk a penny on an uncertainty!

WE ABSOLUTELY GUARANTEE THE WEIL BELT TO REDUCE YOUR WAIST
3 INCHES IN 10 DAYS OR WE WILL REFUND YOUR MONEY!

Don't let a "Bay window" lick you! Send your order today!

Yours very truly,

PRESIDENT
The Weil Health Belt Company

PS-As a special inducement for you to send in your order NOW and to introduce our two new products . . . we will include ABSOLUTELY FREE with your order for a WEIL BELT . . . your choice of the WONDER ATHLETIC SUPPORTER or THE WONDER HAND-KNITTED SUSPENSORY!

Note the
**SPECIAL
FREE
OFFER**
attached!

READ OUR GUARANTEE AND 10 DAY TRIAL OFFER ON FOLLOWING PAGES!

NOW... You can take 3 inches off your waist in 10 days or your money immediately refunded!

You immediately **APPEAR** at least 3 inches smaller around the waist . . .

. . . and in 10 days you will have an **ACTUAL** reduction of 3 inches or your money refunded.

You immediately **APPEAR** 3 inches smaller. Think of it — 3 inches smaller **AT ONCE**, and in 10 days we guarantee 3 inches of **ACTUAL** reduction . . . 3 inches of **ACTUAL** fat removed . . . Many men have written that they have removed as much as 8 inches in a very short time.

All men have a sense of pride, and most all men who are inclined to be fat have protruding stomachs. No self-respecting man should continue to let his bulging waist line embarrass him any longer . . . Wear the Weil belt and watch that waist line become smaller as it has in so many thousands of cases . . . and remember if you are one who finds that it does not reduce, you can return the belt and get your money back — Isn't it worth a **TRIAL?** — It costs you nothing.

Don't Let That "Corporation" Grow!

Young men who are just acquiring a "paunch" . . . should start to reduce **NOW** . . . Do not let that "corporation" grow . . . **KEEP IT DOWN!** While we do not recommend that you can **EAT MORE** because you are wearing a Weil Belt, we do know that our customers write that they have reduced many inches and many pounds without the **SLIGHTEST DIET, STRENUOUS EXERCISE or DRUGS!**

Your scales, your tape measure, your mirror, and the admiring comments of your friends will be a constant reminder that you have adopted a most efficient method of reducing.

Helpful In Many Ways

Delighted wearers have told us of many other benefits in addition to reduction — "on long auto trips, it supports the back so that there is no feeling of tiredness" . . . "when strenuous work or exercise is being done, it supports the stomach and back muscles and helps to prevent strains". Others say that it is a great aid in relieving indigestion and constipation.

In the Physical Culture Institutes where a quick reduction is required, the rubber belt has been found of great aid and is used almost universally. Prominent trainers have told us that it is used by boxers, wrestlers, and jockeys to help bring about the quick reduction necessary to "make the weight"!

It helps to bring back to normalcy the fallen stomach walls . . . it supports the displaced organs and while we only claim that it will reduce fat . . . we have been repeatedly told that in many cases it has effected a great improvement in health.

Exerts a Constant Gentle Pressure

So constructed that it exerts a constant gentle pressure on every portion of the surface at the same time . . . this imperceptible action that brings about reduction is constant and the resilient rubber used in its construction conforms to every change in position caused by your movements.

The Weil Reducing Belt is not infallible, but it has reduced the fat from the waist of so many thousands of men that we do not hesitate to make this unusual offer for you to test this remarkable girdle for 10 days at our expense!

● If you look like this you owe to yourself to at least **TRY** this great reducing belt—and you can do so **NOW** without it costing you a penny if it does not actually take off at least 3 inches of fat from your waist! (See guarantee.)

Just a plain straight deal . . . the belt will be sent to you on trial. Try it for 10 days . . . after 10 **DAYS** . . . keep it or return it and every penny you have paid will be immediately refunded!

● The waist appears at least inches smaller at once. The sagging muscles are consolidated . . . and what a feeling of *comfort*! You are infected with a new feeling of energy for your shoulders straighten, your chest fills out, your entire carriage takes on the snappy military appearance.

Read what others say about the Weil BELT!

Will You Let Us Send You This Reducing Belt On 10 Days' Trial?

Remember that you won't risk a penny for every cent will be returned if it does not do all we claim.

"A REDUCTION OF 58 POUNDS"

Dear Sirs: I have been wearing one of your belts for about 3 years and have sold for you about 12 or 14 to my friends and also 3 for myself. I wish to tell you that this is a belt of great value and I have found it such relief and help. It has reduced my waist line very weight much and also my weight from 250 lbs. to 192 lbs. a reduction of 58 lbs. so that is a great belt I think. Respectfully,
W. T. Anderson
2911A Grace St.
Richmond, Va.

"I LOST 46 POUNDS"

Dear Sirs: Having one of your Reducing Belts for two years and pounds, I find the belt too large to do any more work. I would like to have you send me another one for the same price—So please possible, send it C. O. D. I will pay the postmaster on waist measure is 38 inches or the length of the string which I will include in the sending it, do not hesitate in waiting for the Belt.
Yours truly,
Alex Harmony
Rayard, Nbr.

"FROM 206 TO 154 POUNDS"

Dear Sirs: In April I sent you 12 names and also ordered a Weil Rubber Health Belt. My waist measure has reduced 5 inches and I have reduced in weight from 206 lbs. to 154 lbs. I did not notice any bad effects, and am lost without my Weil Rubber Reducing Belt if I do not put it on. What will you charge me for one for my wife. Please let me know by return mail.
Yours truly,
R. E. Hershner
Lock Box 56, Iberia, O.

"REDUCED FROM 44 INCHES TO 36 INCHES"

Gentlemen: I feel sure that you will be interested to know that I wore one of your belts for seven months and reduced so that now I have to have a new belt and will appreciate your getting it to me as soon as possible for my convenience.
Thanking you, I remain
Yours very truly,
George Bailey
292-295 Eighth Ave. N. Y.

It is shaped to conform to the contour of the stomach.

Made of Pure Para Rubber . . . the perspiration cannot penetrate it as in ordinary inexpensive elastic webbing . . . no soiled perspiration laden belts to be sent to the laundry . . . simply rub it off with a wet cloth . . . It's always ready! . . . And it will wear and wear and wear!

The lace back model is the ideal reducing belt for it allows for at least 4 inches reduction . . . it permits the wearer to take up the slack caused by the immediate reduction we feel sure you will make.

It is shaped so that it supports the bulging contour of the stomach and will not ride up or slip down . . . it will STAY IN PLACE . . . and you will be so comfortable you will hardly know you have it on.

Send Your Order TO-DAY!

You Do Not Need to Send Any Money

(See enclosed Order Blank)

The Weil Rubber Reducing Belt will be sent to you IN PLAIN PACKAGE . . . without a cent in advance. It is not necessary for you to send any money with the enclosed Trial Order Blank. Merely fill out the order and send it to us. The Weil Rubber Reducing Belt, with full directions for use, will be mailed to you at once. When it arrives pay the postman its small cost. Then try it for 10 days. Note the astonishing and delightful results. See how much better you feel. IF IT DOES NOT ACTUALLY REDUCE YOUR WAIST 3 INCHES IN 10 DAYS, just return the Belt to us. Then, without any question or delay, the full amount you have paid, including the money you have spent for postage to return the package, will be returned and this test will have COST YOU NOTHING.

You are to be the sole judge as to whether you keep this belt or not. You risk absolutely nothing. And you gain an opportunity to prove what the Weil Rubber Reducing Belt can mean to you. It permits you to see how easily you may gain that waist line which means better appearance.

Act at once. You cannot lose. For if the Weil Rubber Reducing Belt does not bring you the remarkable benefits which mean so much to you, then it costs you nothing. Mail the enclosed trial Order Blank today. In ordering the belt give your present waist measure. If no tape is handy use a piece of string. Cut it to the exact girth of your waist line and mail it with your order.

As to Our Responsibility--

We refer you to your own bank . . . also Dun and Bradstreet or any Publisher of a National Magazine carrying our advertising. The fulfillment of all claims is guaranteed by all publishers as well as ourselves.

Not one cent was paid for these testimonials!

"3 INCHES SMALLER"

Gentlemen: I am a user of your Belts and found them just what you said they were. The first one that I got was a 46 inch waist. This one should be a 43 inch waist. Please send a Weil Rubber Reducing Belt for a 38 inch waist line address listed. I would like to get it as soon as possible with lace. Yours truly,
U. S. Vet. Hospital,
Livermore, Cal.

REDUCED 6" IN SIX WEEKS!

Dear Sirs: I am a user of your Belts and found them just what you said they were. The first one that I got was a 46 inch waist. This one should be a 43 inch waist. Please send a Weil Rubber Reducing Belt for a 38 inch waist line address listed. I would like to get it as soon as possible with lace. Yours truly,
U. S. Vet. Hospital,
Livermore, Cal.

"REDUCED - AT LEAST 5 1/2 INCHES"

Dear Sirs: I am mailing to you today under separate cover my Reducing Belt. It has three inches smaller and also made has reduced my abdomen at least five inches. I would appreciate your absolute notice as I am in and it is a wonderful support without it very long and I will send bill to be once.
Very truly yours,
A. W. Walsley
New Bedford, Mass.

"WOULD NOT SELL THE ONE I HAVE FOR \$100."

Gentlemen: If I were unable to procure another Weil Health Belt, I would not sell the one I have for \$100.00. This is how much I think of it. I wear it every day and it has certainly reduced my waist and I shall never be without one. Will you kindly send me one extra string as the one I now have is most worn out.
Yours,
U. W. Higbee,
253 Hawthorne St.,
Malden, Mass.
