The Association's Historical Marker Program

On Tuesday, November 4, 1969, as a part of the Annual Homecoming festivities of the University of Miami a commemorative marker was established at the site of the first building occupied by the University at University Court and University Drive, Coral Gables. Dr. Melanie R. Rosborough, Professor Emeritus of German who began her association with the University of Miami in 1927, made the dedicatory address. The Marker was unveiled by Mrs. Bowman F. Ashe, widow of the university's first president and Mrs. George E. Merrick, widow of the founder of Coral Gables and a founder of the university. Notably also present were Mrs. Hazel Pearson Leonard, widow of Jay F. W. Pearson, the university's second president, and Dr. Henry King Stanford, currently the University's president. Mayor C. L. "Jerry" Dressel spoke for the City of Coral Gables and accepted the marker for the city.

U of M OPENED HERE

On this site in an unfinished building originally intended for a hotel, the University of Miami registered its first students on October 15, 1926. It was twenty years before the University was able to begin the move to the site originally designated for it and given by George E. Merrick, which forms part of the present campus. The old "Cardboard College" which stood here was used until 1967, and then demolished.

The Association's Historical Marker Program

On Saturday, January 25, 1969, in cooperation with the Rotary Club of Marathon, the Association dedicated the third of a series of markers to commemorate the building of the Overseas Railroad. The other two are at Homestead and at Key West. Mr. Carlton J. Corliss who had a prominent part in the railroad activity in the Marathon area delivered the dedication address printed elsewhere in this volume.

MARATHOHN — HEART OF THE KEYS OVERSEAS RAILWAY CONSTRUCTION HEADQUARTERS

Marathon began in 1908 as construction headquarters and chief shipping terminal for Henry M. Flagler's "Overseas Railway" to Key West. Through it passed tens of thousands of workers and immense quantities of material and supplies. At nearby Knight's Key Dock trains from New York met steamers from Havana daily until the railroad reached Key West January 22, 1912. The seven mile bridge west of town, resting on 547 concrete piers, was at the time the longest railway bridge of concrete and steel in the world. A storm on September 2, 1935, ended railroad operations. Ten years later the Overseas Highway built on the same track bed and bridges began to be used.
