# KEY WEST.

---

Key West is the county seat of Monroe county, the most unique county in any State of the Union, composed, as it is, of the chain of islands girding the extreme southern end of the peninsula of Florida, together with a small portion of the main land. It may be called appropriately the "Island County," as Key West has long been called the "Island City." Monroe county includes the islands from Cape Romano on the Gulf to Biscayne Bay on the east, among which are the picturesque Ten Thousand islands, Chokoliskee, Key Largo, Plantation Key, Torch Key and many others yet unnamed. This island county stretches northeast from Key West two hundred and sixty miles, and the shore line on the Gulf side is equally long. Key West occupies an island of the same name in latitude  $24^{\circ} 32'$  only sixty miles from the border of the tropics, and but ninety miles north of Cuba, and two hundred and forty miles south by east of Tampa.

This lovely isle is one of the last gems that dropped from the fingers of the Creator, and for centuries it rested like an uncut emerald on the breast of these turquoise seas, its level surface carpeted with living green, above which waved the tall crests of palms, broad spreading banyans, with pine and laurel, and a thick undergrowth of myrtle and mangrove.

On March 25, 1822, the island was taken possession of by Uncle Sam, as part of the territory ceded by Spain, but it was settled in 1819 by persons from St. Augustine, South Carolina, the Bahamas and many other points. When Captain Perry ran up the Stars and Stripes in 1822, he named the island "Thompson's Island" and the harbor "Port Rodgers," which is the name on the original survey and plat of Key West. But the Spanish have always called the island Cayo Hueso (Bone Island), which was finally corrupted by the English into Key West.

**THE BEST SECURITY FOR THE FAMILY,  
THE ESTATE, OR FOR OLD AGE**

Is a Policy of Insurance and Investment in the

# **NEW YORK LIFE INSURANCE COMPANY.**

. . . . WHICH HAS . . . .

**OVER \$115,000,000 IN ASSETS AND AN AMPLE SURPLUS.**

**TAKE FOR EXAMPLE ONE OF THESE FOUR POLICIES:**

- 1.—**THE NON-FORFEITING FREE TONTINE POLICY** furnishing protection for the family or estate at a low rate, in case of death, and an increasing investment in case the insured survives a selected period of fifteen or twenty years. Ask for the results, to the living who insured at your age (which give), of similar policies after fifteen or twenty years' insurance.
- 2.—**THE NON-FORFEITING TONTINE LIMITED ENDOWMENT POLICY.** Guaranteeing an endowment of \$300.00 at the end of ten years, \$400.00 at the end of fifteen years, or \$500.00 at the end of twenty years, for each \$1,000 insured. Ask about Mortuary Dividends on these two Policies
- 3.—**THE INSURANCE BOND WITH GUARANTEED INTEREST.** Guaranteed to return at least four per cent compound interest if you die while you are paying for it, annual interest at four per cent until you die, after it is paid for, and the face value to your estate at death.
- 4.—**THE TEN YEAR RENEWABLE TERM POLICY.** Giving pure insurance at a low price, and leaving you to invest your own money. You may not do as well as the Company would with the additional amount which the other policies cost, but you think you can and it is always best to let a man do as he pleases with his own money. Moreover, some men cannot carry as much insurance as they really need on any other plan.

For information as to the special features of any of these contracts and the standing of the Company, you will need only to send your address and date of birth to the

Key West is less known to the people of the United States and less understood than any city in the Union. It is the largest city and

#### THE COMMERCIAL METROPOLIS

of Florida. The population is 23,000, and it is the tenth port of entry in the United States. More import duty is collected here than in all the other ports of Florida, Georgia and Alabama combined. The receipts have grown from \$45,000 in 1828 to \$827,147.79 for the calendar year ending Dec. 31, 1892.

Add to the import duty the internal revenue collections for 1892, \$293,300.10, and it will be seen that the business of Key West drops into Uncle Sam's treasury the neat sum of \$1,120,447.89 yearly. That this is destined to increase wonderfully on the opening of the Nicaragua canal and the diversion of the southern trade to this port, is believed by all familiar with the position and possibilities of Key West. This city has the finest harbor on the Gulf and the deepest draft vessel can come in to its docks with ease. Beside it is the most southern city of the United States and the natural key to the Gulf. The government has taken steps from time to time to fortify it, but it has never been done successfully. The proper fortification of Key West and Tortugas will protect the entire Gulf coast, and in a few years our government will recognize the necessity for this. Then will follow a railroad, the only thing necessary for the ultimate development of Key West to the largest port in the south, which she will become on the opening of the canal. A railroad is perfectly feasible and the route has been surveyed over the keys by a competent survey corps.

#### THE CIGAR INDUSTRY.

The chief business of Key West is manufacturing cigars, and the heavy custom house receipts are derived mainly from the large importations of tobacco from Cuba. This is the leading center in the United States for the manufacture of domestic Havana cigars, and there are about two hundred manufacturers at work here, employing from ten to six hundred hands each. The wages of the operatives amount from \$60,000 to \$75,000 weekly. This keeps a large quantity of money in constant circulation. The operatives in the factories are better paid than any other class of manual laborers in this

country and good wages can be earned by a novice in a short time. The annual output of cigars is from 100,000,000 to 110,000,000. The climatic conditions are almost identical with those of Cuba, and will always give Key West a most decided advantage over every other section of Florida or other states for this business.

#### SPUNGING AND FISHING.

There is a large amount of capital invested in vessels devoted to sponging. The finest sponges are found in the vicinity of Rock Island, while large quantities are gathered also along the reefs. The spongers are mostly Bohemians who have been familiar with that work in their native isles. Owners of vessels and crews risk together in the sponging business, each man being allowed a certain share of the profits of the trip. When the catch is large and the market fair, the business is very profitable, but like everything else it has its losses. For many years Key West has been the chief sponge market of the United States. Laws have been enacted to preserve the sponge beds from destruction, but the fishermen are not always careful to obey them. In a prosperous year the sponging business amounts to \$1,000,000 to Key West.

Allied to this industry is that of fishing and turtling. The waters among these southern keys abound with fish of many, many species. They are beautiful, and darting about among the corals and sea weeds, look like bright hued flowers. They are exquisitely colored in all shades, from sky blue, gold, scarlet and pink of the deepest hues, to plain grays, silver and browns. Fully half the varieties found here are edible and epicures pronounce some of them the finest in the world. All fish are caught here with hook and line as it is impossible to use a seine in these coral strewn waters. Fish are shipped from Key West to Cuba, New York and other points in large quantities.

The famous green turtle found in these waters finds a ready market in New York and other large cities and commands a fancy price. This business amounts to about \$40,000 a year.

#### THE WORLD'S WINTER GARDEN.

Untouched by frost and clothed the year round with tropical verdure, the keys adjacent to Key West have a climate and soil that is unsurpassed for the cultivation of vegetables

Chas. B. Pendleton represents nineteen of the Best and Largest Fire, Life and Marine Insurance Companies in the World. Call on him if you wish the Best Security against Loss. 435 Front Street.

**KEY WEST LIBRARY ASSOCIATION.**

Organized April, 1892. Judge James W. Locke, President ; Mary A. Taylor, Secretary ; J. Fogarty, Treasurer. Controlled by a board of fifteen Directors, five ex-officio. Maintains a public library of 1200 volumes and a free reading room, supported entirely by the dues and fees of members and patrons. Library rooms in Masonic Temple, over First National Bank, Simonton. Mrs. Wm. DeLacy, Librarian.

and small fruits. Truck gardening is extremely profitable as three or four crops can be raised on the same land each year. There is no season of the year in which some crop can not be cultivated with profit. Tomatoes, melons, egg plants, and numerous other summer vegetables are shipped to New York and other large markets and command extravagant prices. Cucumbers sold at one dollar a piece in February at the Tampa Bay hotel. Fortunes are being made in this business, and in a few years this section of Florida will have become, indeed, the winter garden of the world. Some idea of its extent now can be gathered from the fact that the packages of vegetables shipped by the Mallory line in 1892 amounted to 92,732, and by the Southern Pacific line, 36,774; making a total of 129,506 packages. Along the keys the farmers are also planting extensive crops of tropical fruits, cocoanuts, bananas, plantains, oranges, limes, sappadilloes, avacado pears, pineapples, guavas, and many other luscious fruits, known only to the dwellers in the tropics because they will not bear shipment. The market of Key West is amply supplied the year round with fruits and vegetables, fine fish, turtles and crabs. But the bulk of all these products find their way to the north because of the high prices to be obtained there.

#### A NEW INDUSTRY.

Some years ago a canning factory was in operation here, but there were so few planters along the keys then that the business was not a profitable one. That is all changed now, and for several years thousands of dollars worth of fruits and vegetables have decayed on the farms because overripe for shipping. This immense waste to the farmers is now at an end, for the Martin Wagner Canning Co., of Baltimore, one of the largest in the country, will have a factory open in a few weeks that can take care of 8,000 cans of produce per day. The advent of this company will be followed, we believe, by many others, for manufacturers must see the wisdom of canning fruit and vegetables on the ground, thus saving their heavy losses in transportation.

#### PUBLIC IMPROVEMENTS.

Although forty miles from the mainland of Florida, surrounded by a boundless sea broken only by the vision of other islands still in their native green, Key West is not out

of the world as some people seem to think. She has telegraphic communication with the world by means of the cable from Punta Rassa to Cuba, three lines of steamers from New York, Tampa and New Orleans, that will land one at Key West after a most delightful sea voyage of three days or eighteen hours as one may prefer. The Plant steamers Olivette and Mascotte carry the West India fast mails, arriving here twice a week in summer and thrice weekly in winter. Key West has the finest electric light plant in the state and one of the finest in the south. It is the Thomson-Houston system and has both arc and incandescent dynamos. Six or eight miles of track is in use by the street car association, which contemplates changing from mules to electric motors at an early day and extending the line into the suburbs. A telephone system has been in active operation ten years and is now undergoing thorough repairs and improvement. The city has a good fire department consisting of four steam engines, four hose carts with 5,600 feet of hose, beside 4,000 feet owned by the government and always available, one hook and ladder truck, all drawn by trained horses, and twenty paid men—engineers and drivers—beside over one hundred volunteers. An electric fire alarm with about 100 stations is in use. Bonds to the amount of \$100,000 have been voted for a water supply for fire protection, and the Holly Manufacturing Co. is under contract to put in the works within a few months. The streets are being graded and paved. A ten ton ice machine has been ordered by a company which proposes to manufacture all the ice needed for local use. The streets are lit by gas, with a few electric lights paid for by private persons.

A new substantial court house and jail costing about ——— have been built recently by the county, while the city has just erected a city hall, market, jail and fire station costing \$60,000. The United States government has erected a handsome custom house and court house costing \$80,000, and in the past year has expended \$50,000 on the barracks, which are now garrisoned by the two batteries.

The government supports a marine hospital which cares for sick and injured sailors.

## SCHOOLS AND CHURCHES.

A complete system of public schools is maintained for both white and colored children, and besides these there are numerous popular private schools, both Spanish and English, the largest of which is the Convent of Mary Immaculate, kept by the Sisters of the Holy Names. St. Paul's Episcopal church is the oldest and most wealthy on the island. Besides there are two Catholic, three Methodist, two Baptist, one Congregational, and one Holderite church for white people, and Baptist, Methodist and Episcopal churches for colored people. Nearly all of them own comfortable houses of worship, the First Methodist church, which is of stone, being the handsomest.

## A HEALTH RESORT.

As a health resort Key West is unequaled by any city in the entire country. The impression prevails abroad that it is a very unhealthy city, but there is no foundation for such a belief. Yellow fever is imported at long intervals from Cuba, but its treatment is so well understood by physicians and people that the mortality is very low. Less dread of it is felt here than the people of the north have for diphtheria, pneumonia or small pox. The extreme healthfulness of this city is shown by the records which give a mortality of only 2.9 per cent. What city of its size can equal that? The salubrious climate, salt sea breezes and equable temperature, make this the Eldorado of all persons afflicted with consumption or any lung, throat or nervous diseases. Some of the oldest residents of Key West sought this climate for the cure of consumption and have since lived here enjoying many years of robust health.

## A SPORTING AND PLEASURE RESORT.

This city is visited annually by thousands of tourists, who turn from the cold icy north to seek a climate where they can rejoice in outdoor life. The mean average summer temperature is 79.8° and in winter only 74°. It has never been known lower than 41° which was but once in Jan., 1886, and highest temperature known was 97° in July, '80. The temperature in summer seldom exceeds 90° and the heat is always tempered by cool salt sea breezes, and daily thunder showers prevail in July and August. There is never a day

that one cannot spend out doors or bathe at will in the sea. The daily range of temperature is but 8.08° which insures a mild and equable climate.

Sportsmen find their greatest pleasure angling for the gamey tarpon, king fish or trout, beside the hundreds of other beauties of the finny tribe that infest these waters. There is fine hunting on the adjacent isles, and the yachting is unequaled anywhere.

The new Russell House is the leading hotel. It has seventy-five rooms and all modern conveniences. The Duval House opposite is smaller, but no less popular, and its restaurant is the favorite resort of passing tourists. Numbers of smaller restaurants and private boarding houses afford accommodation for many people. Efforts are now being made to induce capitalists to erect a fine tourist hotel on the island, and they will be successful no doubt. Then Key West can outrival Tampa, Jacksonville or St. Augustine as a tropical pleasure resort, for it can offer what they can not, a summer climate the year round, sea bathing in mid-winter and abundant aquatic sport in its own harbor.
