William C. Cutler A Short Sketch of the  
Life of that Gentleman

Apparently in the previous issue of the Metropolis  
his death had been mentioned

goes on to tell that he was a practitioner  
of medicine + Surgery of Chelsea, Mass. for 24 yrs.  
That he experimented in bovine vaccine  
and founded the New England Vaccine Co.

It details his birth & education (He was  
a Homeopath) & the fact that he founded  
Cutler, Fla.

This together  $\bar{c}$  Penine would make  
an interesting Bulletin article.

A Town That Is To Be

A long article about Cutler, Fla. & The  
Paving Grant. Quotes Dr. Cutler as saying  
he has hunted & fished - Hawks / 40 in Cutler  
area and bought his "plantation" 14 yrs ago.  
Agreed to represent the 36 settlers in Washington  
in their claims against Henry Perrine (son of Dr. P.)  
and Mr. Flagler. Also see article p 8
