Pensacola

Editorial: West Fla., p.764

"John V.D. Voorhees, M.D., presented his diploma from the University of New York, which was deemed sufficient, and was therefore licensed to practice medicine in the city of Pensacola." This refers to a meeting of the Board of Health of the city of Pensacola on July 23, 1821, at which the first three doctors were accepted to practice medicine in Pensacola, according to an ordinance regulating the practice of medicine issued on July 21, 1821. This ordinance is reproduced in the above reference, p. 764. Voorhees was the second man accepted to practice under the American rule . It is of interest that Dr. Voorhees was the Health Officer on the Board of Health. "In September 1821 Dr. Voorhees became associated with Dr. Bronaugh in the practice of medicine \_\_\_\_\_

VON BALSAN

VonBarsan, Dr.

c. 1865

Haines and Thorburn: 75 Years of Dentistry, p. 3

"Dr. VonBarsan was practicing in St. Augustine (about 1865) . He was, he informed me, an ex-surgeon in the German Army. He had drifted down into Florida on the ebb tide of misfortune. He was an educated and brilliant conversationalist, the father of the celebrated painter who's works of art now adorn the salons of New York and Paris. His knowledge of the specialty of medicine and surgery to which dentistry belongs was not of the highest order, and his patients were not always effusive in praise of his finished product."
