Invalid, An: A winter in the West Indies and Florida, Containing General Observations Upon Modes of Traveling, Manners, Customs, Climates and productions. With a particular Description of St. Croix, Trinidad de Cuba, Havana, Key West and St. Augustine as places for resort for Northern Invalids, New York, Wiley and putnam, 1839.

This, one of the very few books that denies the value of Florida's climate for the health, appears to be written by a severe neurotic with a sarcastic temperament. However, he does make entertaining reading.

The copy I saw was in the Historical Museum of Southern Florida and the Caribbean, 2010 N. Bayshore Dr., Miami, Florida 33137.

Izlar, R.P.: Inaugural Address (as President of the FMA),

Transactions of the Florida Medical Association,

19-20,  
April, 1899, pp. 23-29,  
A

This appears to be an address to the annual meeting of the FMA given at the end of Izlar's term as President (1898-1899) although it is termed "Inaugural Address."

He details some of his experience as Chief Surgeon of the 3rd Division hospital of the 4th Army Corp at Tampa during the months of June, July and part of August, 1898.

Have abstracted portions for the chronological file. Photocopy of the paper is in the file "Spanish American War Medicine."

Jackson, E. Russell, Jr., M.A., M.P.H.: Indigent care and  
public health in Florida, 1931-1985, J.F.M.A. 73:  
280-285, April, 1986.

An excellent account of the Burnsed Act of 1983 and its  
sequellum, the Health Care Access Act of 1984, which have  
enabled the county health units to establish outpatient  
clinics of the general practice or family practice type  
to care for the medically indigent - non-medicare and  
Medicaid for the most part. These are open to the general  
public but it is anticipated that paying patients will  
prefer other delivery systems. These clinics can buy  
services from private practitioners and hospitals altho  
they do not pay "top dollar."
