Editorial

While our Federal Government concerns itself with wars in Iran and Afganistan, the United States is being quietly invaded by one of the most destructive forces in the world. Our conventional weapons are useless against the invasion, so instead of fighting them - we allow them to wade ashore unopposed. Dade County is under attack, and if we're still part of the State of Florida, then America is under siege too...and nobody seems to care. The Haitians are coming, in increasing numbers and they are a destructive force. If you don't believe that, consider this, they're the best sailors in the world. What other Navy can put 150 people in a 45 foot sailboat and travel across hundreds of miles of open sea and land precisely on Miami Beach. They bring with them their women who rival rabbits in their ability to reproduce. They have taken over the maternity ward of Jackson Memorial Hospital, the State Employment Offices at 79th and Biscayne, and the Food Stamp Office next door. They have successfully infiltrated and overloaded most state and local welfare services. It's true the Haitian invaders do not bear arms, because they bring more destructive weapons, veneral disease, leprosy, and tuberculosis. They have no leader so they act in guerrilla groups, living 20 - 30 to a single house. They rob and steal and our Dade County jails are full of Haitians. While behind bars they destroy the county jail property. They practice voodoo, they fight with other inmates, and they refuse to follow the rules which they don't understand because they can't understand English. The Haitian invasion is a genuine threat to Dade County - and nobody seems to care.....we'll have more to say tomorrow.....

That's WIOD/WAIA's Vice President and General Manager, Bill Viands, with today's editorial comment. Contrasting views by responsible spokespersons are welcome.

Editorial

The Haitian invasion continues and nobody seems to care -- except the poor hard working citizens of Dade County who are suffering from its affects. None of our political leaders seem to care that the Haitians are a blight on the area. They are a blight and if you don't believe me drive down 82nd Street between North Miami Avenue and N. W. 7th Avenue. You'll see mountains of junk in the street and wrecked cars on the curbs and in the front yards. Drive into little Haiti and see how they have wasted the area. This invading force is mobile too. They're able to buy plenty of old cars which they regularly crash into local citizens, and of course they have limited insurance, if any. When their vehicles quit running, like good soldiers they abandon them on the spot and strip them of there radio, tires and batteries. Our streets are littered with disabled Haitian owned vehicles - but nobody seems to care. Even the leaders of the Black Community of Dade County do not resist the invaders. Yet the Haitians are here to compete with local Blacks - to take their jobs - and they are doing it. Yet nobody seems to care. The Haitian invasion must stop -- we're concerned and you should be too. Tomorrow we will deal with possible answers to end the Haitian invasion.

Editorial

The Haitian invasion must stop. These destructive people are not politically oppressed -- they are economic refugees and have no right to come here. We have plenty of American citizens in Dade County who are economically oppressed and they come first in our opinion. In order to stop the Haitian invasion we must first get the attention of our Governor, who used to reside in Miami Lakes. We propose that since Governor Graham has not taken an active and vocal role in resisting the Haitians, that he at least consider allowing Dade County to use his dairy farm in Miami Lakes. In his open fields we proposed a tent city be erected to house the Haitians until permanent homes can be found for them. Don't worry about moving the cows, Bob, the Haitians won't mind -- it will remind them of their native land. Of course there is a danger that a few cows will come up missing. The Haitians still believe in good meals and voodoo sacrifices - but it's all for a good cause Governor. Yes, Governor Graham your Miami Lakes farm is a perfect place for the Haitians -- and your Miami Lakes residence is a perfect place to monitor their progress from. Let's get the Haitians off the streets and on to your farm where they belong. Now that we have Governor Grahams attention, we must now direct our efforts toward Washington. Tomorrow we will give you our thoughts on that.

Editorial

If the Haitian invasion is to be halted we must do something to get the full attention of Washington to our problems. Their solution of just sending millions of dollars to our local federal bureaucrats is not the answer. Since war is always the first concern of the Federal Government let's use that to our advantage. We suggest Mayor Steve Clark declare Dade County a separate republic and secede from the State of Florida. When Washington hears about that we'll have 50,000 troops in here over night. They'll impose curfews and other much needed discipline and "poof" the crime problem in the streets is solved. Since we're an occupied country, all immigration legal or illegal will be discontinued. If we're lucky, the Federal Government will rebuild riot torn Liberty City and they will probably revitalize our local industries. If history repeats itself, within one year we will be as strong as Japan or West Germany. We could end up as the most powerful county in the country - we could even close the Haitian Refugee Camp on Governor Graham's Miami Lakes Dairy Farm that we suggested yesterday. Sure all this is ridiculous.....we don't want to put the Haitians on Governor Graham's Farm, and we don't want to secede from the Union.....but the Haitian invasion must stop -- won't somebody help us -- doesn't anybody care? Dade County is really hurting and nobody seems to care.....we're still part of America and we need help ----- now we know how the hostages must feel.....
