## YOUTH CENTER WAR MEMORIAL

By UPTON C. EWING

There seems to be a varied difference of opinion among the people of Coral Gables regarding a proper and fitting memorial to honor our soldier dead.

It is being proposed that a memorial in the form of a Youth Center be erected somewhere in Coral Gables. A temporary location has been acquired in a vacant store room and plans are now in progress to furnish and equip the place for youth's entertainment.

It may be a cautious move on the part of the committee to give the idea a good tryout and to get the reaction of the necessary financial contributors before proceeding on a definite plan. Public reaction is sometimes difficult to forecast, and it would be wise to endeavor to eliminate as much as possible a certain amount of disfavor that always accompanies the pursuit of any worthwhile project. The committee for this project is most sincere and capable and it is not here intended to criticise their efforts or disparage their decisions.

I would like however to point out in a strategic way just what the opposition may feel toward this project as planned. Beautiful and inspiring are the memorials to Lincoln, Jefferson, and Lee. They gave their full measure of devotion to a cause, as did the departed sons of our fair city, whom we now seek to honor.

Is there anyone who would propose that a Saturday night jamboree be held in these sacred halls? Could anyone imagine our frolicking youth lixterbugging down thru the rows of stately Doric columns while a juke organ boomed out the tune of "Hot Licks Papa"?

It may not be entirely fitting and proper to immortalize the deeds of courage and valor, sacrifice and fear, or tune the drip, drip, drip of the last drop of precious blood, with the giddy click-click of pingpony balls as it willy nilly bounces under the table and rolls away to?

Nor does it seems fitting to tune the valiant efforts of the wounded boy in the fox hole, who with a dying solh heaves his last grenade toward the rising sun, to the senseless flinging of a chicken tailed dart at a pasteboard circle.

Some pe

Some people, through necessity, honor their departed loved ones with some simple quiet formality. Others, who are financially able, erect some dignified memorial, or contribute generously to the arts, or expand their devotion through charity and religion.

It is a polla thought which available to the contribute of th

tion through charity and religion.

It is a noble thought which prompted the organization of a committee to build a youth center. They are deserving of the highest praise. The proper guidance of our youth has long been a trying problem, and the committee is entitled to and should receive the support of the community toward the erection of a permanent youth center. They are also entitled to full support to the erection of a suitable memorial to our soldier dead.

To lay a wreath at the foot of a long list of revered names to the tune of "Pistol Packin" Mama" is as the mixing of hot oil with the cool still waters.

The present travel situation is largely a matter of simple arithmetic. Railroads are handling three to four times as many passengers as before the war but, due to the war, they have for less equipment available for civilian use.

During pe Railway was able to operate as many extra winter trains as travel required. Some of the trains, such as the "Florida Special" were run in as many as eight complete sections. That made it possible to accommodate almost everyone on or about the date they wanted to leave for their trip home.

But today it's a different story. So many railroad Pullmans and coaches are needed to move troops that equipment can't be spared for extra Florida service. Even a large portion of the space on existing trains has to be reserved for military use.

So if you have to we hope you will realize that war conditions are chiefly to blame, and that we are doing our best to meet the situation. Extra equipment, particularly Pullman equipment just cannot be obtained. Naturally the needs of essential to winning military and other to the war must come i .

BECAUSE metals and other communication materials are so badly needed in war, it is becoming more and more difficult for the telephone company to fill service requests. In fact, facilities are now insufficient to meet the demands for service. So unless you qualify as an essential user - one whose telephone usage is directly essential to defense or the health, welfare or security of the community as a whole — we regret that you may experience delay in getting service.

When facilities are available, they must be employed first for essential users. Then, from any facilities remaining, others will be served in their regular order. We will be glad to take your application for service and notify you when facilities

### Look at This Angle

The Coral Gables Planning Board can do much to preserve the lives, limbs, and property of Coral Gables motorists and pedestrians if they include in their post war aims the elimination of slant parking in Coral Gables. If there's any doubt in the minds of the Board regarding the dangers of such a parking system, we suggest that the survey the police accident records for the past year or so. Each week brings anywhere from three to eight accidents, incurred when motorists hedged in between lines of cars, attempt to edge out into the thorofare. True, most of the accidents are minor—but each, nevertheless is a potential source of serious damage and danger.

No matter how carefully the operator of a parked vehicle peers through adjacent car windows, cranes his neck to the rear, or edges his car back, the fact still remains that he is driving "blind" until he is three quarters of the way into the passing traffic. The fenders of approaching cars are fair game for his

A partially disabled soldier had grown cynical and sour towards the country he had fought for. He thought the nation had no more real use for him even though the industry to which he applied made a place for him and gave him the sort of work he was able to do. The plant physician helped him to restore his faith. He saw that as a rehabilitated veteran he actually had more to give than other workers. With the discipline he himself had learned in Army training he could lift the spirit and discipline of his whole department. And the country needed him for that even more than for his usefulness as an inspector of small parts.

B now in the news there is looming up the very great question of Russia's access to the open sea both in peace and in war. We shall do well to take this control of the state the open sea both in peace and in war. We shall do well to take this question very seriously. For upon the wise and successful solution of it the relations between Russia and the Western powers depend.

There are three maritime, highways to Pursia castern Asia. There are three maritime highways to Russia from the Atlantic Ocean. One of them is around the North Cape. We have kept it open but only at great risk and cost because the Germans overran Norway and because Finland sided with Germany. The second is through the Baltic Sea. It has been closed because the Germans occupied the whole southern shore from Denmark to the gates of Leningrad, and all the entrances to the sea. We are brutally assaulted, again and again.

Thru the course of my life I have tried to be good,

And sometimes he drives me into a deep ditch
Then calls me vile names, chiefly ending in "itch".

The question of Bulgaria came up. He reminded the other experts of the long background of bitterness between the Bulgarians and the Greeks and Serbs across the border. He recalled the disputes that for decades had divided them from their neighbors and created hardships, bloodshed and animosity. In this atmosphere of hatred whole generations of Bulgarians had been brought up. He reminded the other exup.
