NEWS FROM MIAMI SHORES SCHOOL

The Miami Shores Junior High School opened Monday, Sept. 19th, with Principal Wagner, Mr. and Mrs. Lane and Mrs. Orth at the helm. The school rooms have been renovated and decorated. They present a fine appearance.

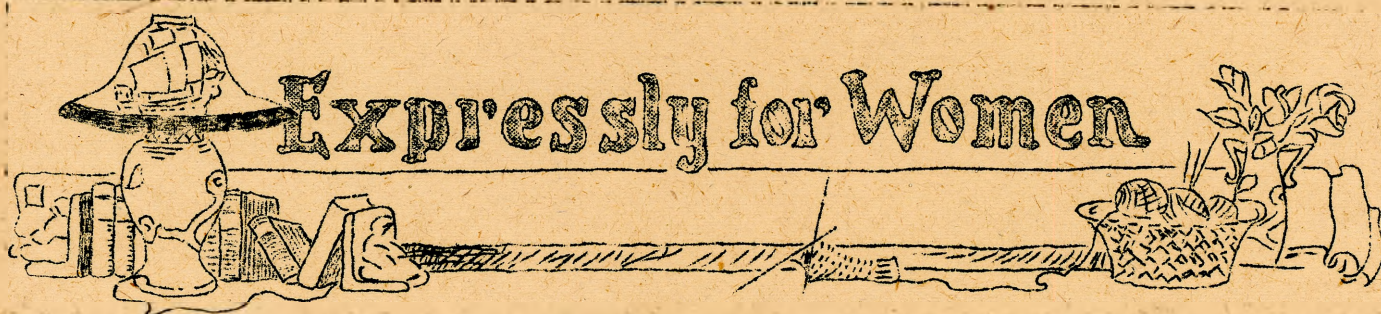

Mr. Wagner states they will take up Physical Education this year. There will be base ball, tennis, and basket ball for both boys and girls. Mr. Lane will coach the girls and Mr. Wagner the boys.

The first P.T.A. meeting will be Oct. 5th. All members and everyone interested in the school are urged to be present, as matters of importance will be brought up.

Mrs. Eva Gepfert, who has taught in our school several years, has been transferred to Fulford. She will be greatly missed by the faculty and scholars here.

NURSERY ROOM

The most desirable room for a nursery would be sunny, altho not glaringly light. White has been used extensively for walls and wood work, chiefly for sanitary reasons. It has been found, however, that white is often monotonous and glaring for the child. A tinted wall is considered better. It may be ivory, light buff, pearl-gray or deft blue or pale green.

The exposure of the room has a great deal to do with the choice of color.

The electric lights in the room must be so shaded that direct rays of the bare bulbs cannot reach the infant's eyes, no matter in what position it chances to lie.

WHOOPING COUGH MEDICINE RECIPE

This has been tried and used for years with much success. Copy it or save it in time of need.

$\frac{1}{2}$ lemon sliced thin and put into 1 cup water and $\frac{1}{2}$ cup sugar and cook until thickened; then add $\frac{1}{2}$ cup honey and cook until it is thicker. When cool add $\frac{1}{2}$ ounce syrup squills, $\frac{1}{2}$ ounce glycerine. Give to child three times a day after meals. If you think the child has been exposed to whooping cough, give this syrup. It will not hurt the child. Children never have it very bad when this is used.

COMBINATION SALAD

1 package lemon jello prepared as to jell. In this put $\frac{1}{2}$ cup vinegar or the juice of 1 lemon. Add 3 level tablespoons sugar; pinch of salt. When it begins to jell, put in $\frac{1}{2}$ cup finely chopped cabbage and $\frac{1}{2}$ cup chopped celery or 1 cup of either. $\frac{1}{2}$ cup of any kind of chopped nuts; $\frac{1}{2}$ pimento chopped fine and 1 green pepper or anything colored, such as beets, if you like them.

This is pretty in jello molds when you arrange the green and red in the bottom of mold to look like some kind of flower. Lay on lettuce leaf.

DON'TS FOR WIVES

1. Don't be jealous of your husband's work.
2. Don't fail to give him the proper environment in which to work.
3. Don't mind having your presence taken for granted.
4. Don't say "I told you so" when you find in his own waste basket the stud which he has said you lost.
5. Don't disturb any of his papers.
6. Don't say "Oh, you go on and I will go with you next time".
7. Don't go in for tears, reproaches or scenes.
8. Don't ever fail to be devoted and tactful.

NOTE

If you have any good recipes using Florida fruits, please send them in. They would be much appreciated.

TOWN HALL NEWS

The public hearing on the question of a Municipal Electric Light Plant will be post-poned one week, according to Mrs. Mary A. Brasher, Town Clerk. Monday, Oct. 3rd will be the date of the hearing, instead of next Monday.

It was announced at the Town Hall that Avenue "D" and Harding Ave. and the two blocks in Fulford (constructed to give access to the fire well) will be opened to traffic within the next few days and will be kept open for several days prior to the application of oil and slag and sand.

Great interest is being manifested over the Engineers' Report on the proposed Municipal Electric Light and Power Plant, which is on file in the office of Mrs. Mary A. Brasher, Town Clerk. Many citizens have read the report and the advisability of a Municipal Plant has been the subject of a number of discussions.

The Miami Optical Co., last week, presented to the Town of Miami Shores, two pairs of motorcycle goggles for use of the police officers.

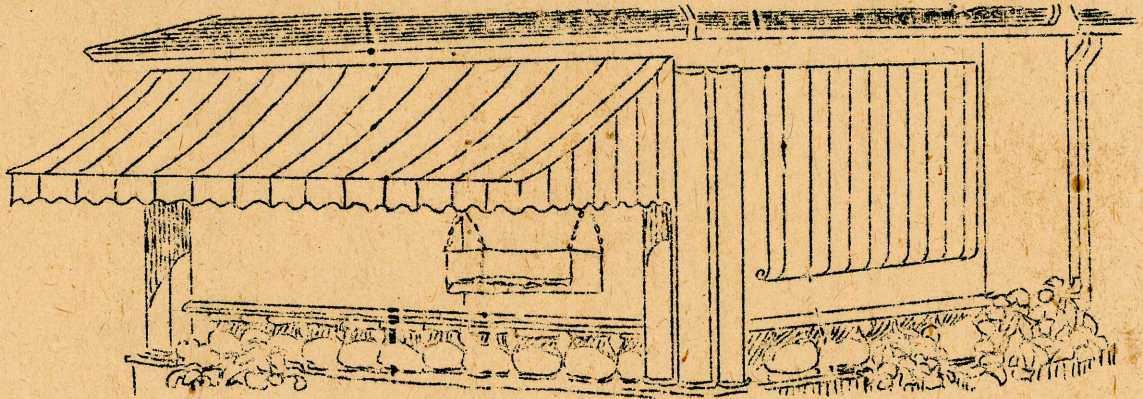

The Morgan Hill Paving Co. has a crew of men at work clearing up and grading the parkways. As soon as this is finished, and a few corrections made in sidewalks already laid, the present sidewalk program will have been completed.

POLITICAL NOTES

H.H. Hawthorne was born in a farming village in Iowa in 1885. After finishing High School, he taught school for one year, completed a short law course, and then moved to Chicago, where he entered the live stock brokerage business, at the Union Stock Yards. He remained there with one brokerage house for fifteen years, rising to one of the most responsible positions in the business.

When Government control over the live stock business was establish-

THE BISCAYNE PARK AWNING Co. "A Complete Awning Service"

POLITICAL NOTES CONTINUED

ed, it became necessary for the ninety-five firms in Chicago to conform to one accounting system, and it was decided to select a committee of three men to work out a system that would be practical and concise, and yet meet the requirements of the Secretary of Agriculture. Eighteen hundred persons were eligible for appointment to this Committee, and Mr. Hawthorne was one of the three selected. He took a leading part in this work, and the system devised by the Committee, which was adopted and put into effect, met with the highest praise on the part of the brokerage firms, as well as the Government officials.

Mr. Hawthorne took an active interest in settlement work in Chicago, and for two years was an aide to Jane Addams at Hull House.

When the Hartford Fire Insurance Company opened a new department for insuring live stock in transit, the volume of business grew with rapidity, and it was found necessary to secure an experienced live stock accountant as Assistant Auditor of the Company. The Comptroller of the Company went to Chicago, and after examining twenty accountants, appointed Mr. Hawthorne to this important position, which he held for three years.

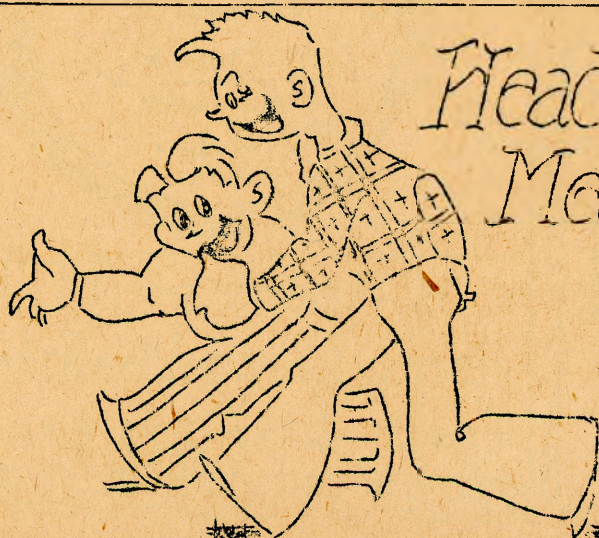

He returned to Chicago to accept a four-year contract with a brokerage firm, at a salary of Four Hundred and Fifty Dollars per month, but after serving under this contract, he was attracted to Florida, and secured leave of absence in January, 1924, to come to Miami. Here he was retained by the largest wholesale grocery brokerage house in the City, and was given complete charge of the office. In the Fall of 1924 he moved to Biscayne Park, and entered the real estate business, being one of the officers of the Dade Orange Corporation.

Mr. Hawthorne was married in Hartford, Conn., in 1919 to Miss Ester Crusburg.

Ever since the incorporation of the Town of Miami Shores, Mr. Hawthorne has taken an active interest in municipal affairs, though he is not by any means a politician.

On August fifth last, he was nominated for the office of Town Clerk and Treasurer, by the unanimous vote of the delegates to the famous Harmony Convention. Mr. Hawthorne was not present at the meeting, nor had he solicited the support of any of the delegates; but when the Convention began its consideration of these two offices, Mr. Hawthorne's fitness for the position was conceded by all.

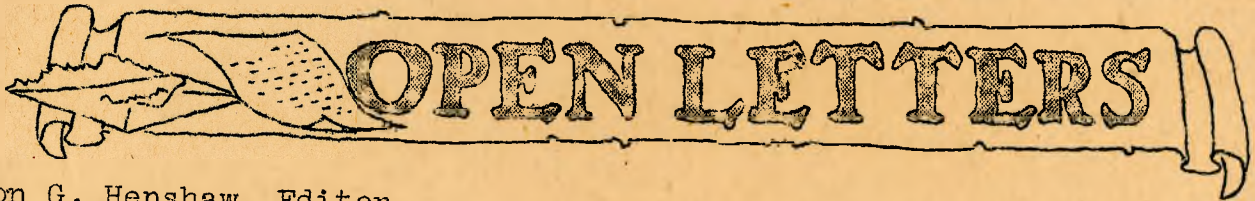

News of this nomination was received with great satisfaction by

OPEN LETTERS

Don G. Henshaw, Editor,
Miami Shores Bulletin,
Miami Shores, Fla.

Dear Sir:

The question of the adoption of an ordinance, declaring it expedient for the Town of Miami Shores to issue bonds in the amount of one hundred eighty-five thousand dollars (\$185,000.00), for the proposed Municipal Light Plant, comes before the voters for a public hearing, Monday night, Oct. 3rd. Prompted by your suggestion in the last issue of the Bulletin I have devoted quite some time to the study of the report of Messrs. Huff and Roberts, Town Engineers, on the proposed power plant.

Their report, being of its nature technical, requires more than a superficial reading, if one wishes to speak intelligently on this subject, and if I have erred in my criticisms and conclusions I trust that it will be attributed to my lack of scientific knowledge. In the following remarks I shall endeavor to point out why I do not think it advisable, at least at this time, to build this proposed power plant.

The question of Municipal ownership versus private ownership has been a subject of debate for years. It has been argued that Municipal ownership savors of Communism and Socialism with all its inherent inefficiencies. Speaking editorily the Saturday Evening Post in its issue of Sept. 17th under the caption "Improvements in Railway Finance" says, "The railways took back their properties from the Government in run-down condition". Under private ownership, "efficiency of management increased, service was improved, costs of operation reduced.....we do hold a brief in favor of the financial improvement of the utilities upon whose efficiency our prosperity is dependent." In Government or Municipal ownership we have the evil of political preference in the appointment of the personnel. Appointments are not always made, unfortunately, with the thought of efficiency but frequently as political patronage. It is unlikely that such a condition will materially affect our community, that is, if we can always maintain the same type and caliber of men who now control the destinies, in a large measure, of our town. It is, nevertheless, a factor to be reckoned with.

According to the Engineers' report the success of the power plant is contingent up on the sale or the output of the ice plant. Ice manufacturers in the Miami area are equipped to produce many times the quantity of ice now needed. It is, therefore, only natural to assume that we would have to meet a competitive price.

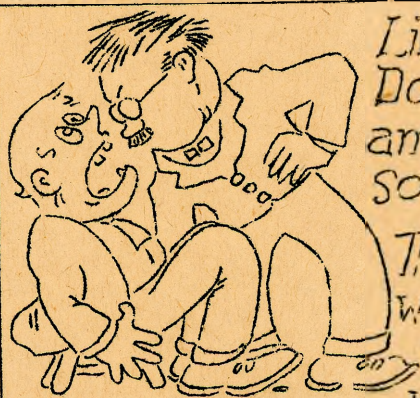

In the Engineers' report there are three pages devoted exclusively to the schedule of light and power rates of the towns of Vero, Sebastian, and Lake Worth. It is interesting to note that whereas we propose to sell light a .08 per KWH, the rate in Vero is .10 per KWH and in Sebastian and Lake Worth .15 per KWH. It would be interesting to know if any of these towns ever had a lower rate. These towns are all larger than Miami Shores. Lake Worth has a population of 8,000.

OPEN LETTERS CONTINUED

No comparative analysis is made of the gross revenue derived from the sale of electricity in these towns nor of the equipment or cost of operation. An analysis such as this would give us a chance to compare actual results in similar towns. It would not be necessary then to condition the assumed net profit for the operation of the combined Light, Water and Ice Plant on the sale of ice. As it is we have nothing but a theory which if carried out without a more comprehensive study may be productive of financial disaster, as is the case with an ever increasing number of small utilities, both privately and Municipally owned.

It has been argued that now is the best time to carry out our proposed Municipal improvements, because of cheaper labor and material. But the facts are again overlooked. A comparison of costs today should not be made with the abnormal prices prevalent in 1925 nor with the subnormal prices prevailing in some commodities yet. By far the greatest portion of the cost of a power plant and transmission lines is used in the purchase of equipment. The labor incidental to its installation is skilled labor which always commands a certain set price. Then, too, with the Bond Market for securities of South Florida Municipalities loathe to purchase our bonds at .85 we are adding 15% to the normal cost which under normal conditions should not be more than 5%. I believe that the Bond Market for these securities will materially improve within the next few years. The fact that the bonds of the City of Miami have been recently approved by the New York State Department of Banking making them legal investments for Savings Banks in that state leads me to believe that our own Municipal securities will have a better market in a few years.

For the year ending July 30, 1927 the Florida Power and Light Company had a gross revenue in the town of Miami Shores of \$12,823.84. Add to this a contemplated annual street lighting system of \$10,000. would give us an immediate annual revenue of approximately \$23,000. According to the Engineers' report the power plant (machinery, building, equipment and distribution lines) would cost \$142,000. A bond issue of approximately \$170,000 would be necessary. A total gross operating expense the first year, is placed at \$37,486. Depreciation is figured over a period of twenty years which, according to the Engineers

OPEN LETTERS CONTINUED

I conferred with, is too long. They suggest fifteen years which in my estimation would be preferred for 100% efficiency in operation. I think that in twenty years there will be so many improvements that equipment purchased today would be practically obsolete by that time. The Engineers' figures are based on 6% bonds while those outlined in the ordinance draw interest at 7%. This would not materially affect the cost of operation as it can be assumed that we would receive several points more for our securities.

The total first year cost as stated above is \$37,486, while the gross revenue is \$23,000. This shows a deficit of \$14,486. The Engineers' estimate on the cost of insurance should be approximately doubled. Depreciating our bonds over a period of fifteen years and allowing for an attendance charge equivalent to that of the Florida City Power Plant, a deficit of over \$20,000 could normally be expected. This brief analysis would show that a power plant would not possibly be a success in our residential community. If we had a more densely settled and more compact town (the Atlantic Ocean is the eastern boundary of the Town) and with some industries (large consumers of power) it is possible that we might make an excellent showing. We are not a manufacturing community, however, and the people whom we wish to serve are scattered far and wide. A prospective potential revenue as contemplated in the Engineers' report is the sale of electricity to those now without it but considering the revenue derived from this source the expense is prohibitive.

The crying need in the Town today is for decent water and some sort of street lighting system. We voted funds for a water system last year but as yet we have no water plant. As for street lighting, I understand that the Florida Power and Light has submitted a tentative plan of 146 lights that would cost us approximately \$9,000 a year. We want street lights--- this winter if possible. It is expected that this will be the best tourist year Florida has ever witnessed. Let's make the most of it by advertising our town. No better plan can be adopted than a well thought out street lighting system. In addition to making the town more attractive, we will all appreciate a feeling of security that a little brightness here and there will give. The Engineers suggest a street lighting plan

OPEN LETTERS CONTINUED

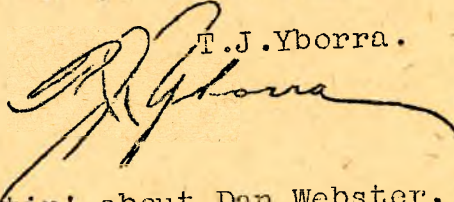

of some 300 lights. There seems to be plenty of "light" on that subject.

In conclusion let me urge every citizen to study the Engineers' report and attend the public hearing Monday, Oct. 3rd, so that the best interests of our community may be served. I cannot help but feel that this is not the best time to increase our bonded indebtedness another penny if we can avoid it.

In these days economy should be our watch-word. Let us make our Town attractive with low taxes.

Respectfully yours,

T.J. Yborra.

DEAR EDDITUR:-

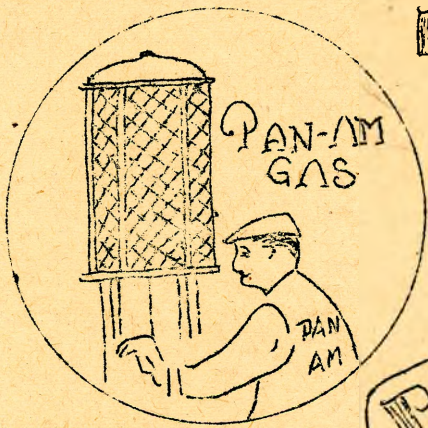

Sense writin' about Dan Webster, the fameus orrytur, makin' up the Dictinnerry, my mail hez bin deluaged by a lot uv well meanin' peepul who want to correct a humbel conscietius cittizen uv Miami Shores like meself.

They one an' all say that it was not Dan Webster who fixed up the fameus Dicctinnery a-tall. Instead, they say it was Noah.

Now, I um a very resigned sort uv man an' hessitate to put meself forrward as being contrary or a argifier; but in my simpel way, I will hev to cum out wid my side to prove they are wronge fer wonce.

For a conclusive authorety, we will take the book ivery one including infidels rushes to, when he wants to prove his partecular brand uv religion is the best. After dustin' it carefully, turn to one uv the furst chapters therin. If you don't hit the rite chapter furst, it won't do you eny harm to read it enny how. After reading along aways enny persun uv good judgment wud know that Noah built the Ark.

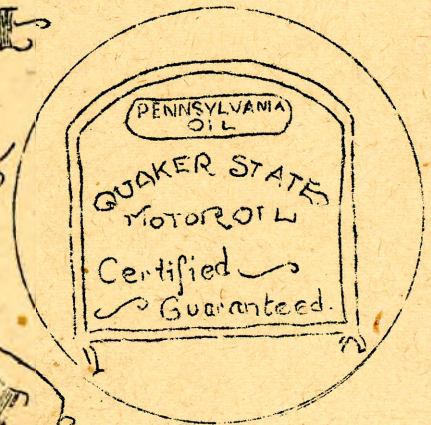

The Arch Crick grammatical instrooctor wonce told me ye shud use the artickel THE instead uv the littel a when meanin' sumthin' real definate. When I say THE ARK hercin, I meen somchtin' most extraordinerry definete. MORE POLITICAL NOTES

At a harmony meeting held f few weeks ago at the home of Mr. W.M.Bennett, which I had the honor and pleasure to attend, several candidates for the various offices, to be voted on at the November election, were discussed by those present. Among those selected was Mr. J.B.Jefferies, for Mayor. The selection was unanimously adopted and all present agreed that Mr. Jefferies was by far the best man available for this office. So much has been said already in the letters that have appeared in the "Bulletin", about Mr. Jefferies' qualifications, that I find it hard to add anything of any importance and I will only say I heartily endorse Mr. Jefferies for Mayor. Those who know Mr. Jefferies will agree with me that "To know him is to admire and love him", and those who do not know him, have missed a rare treat.

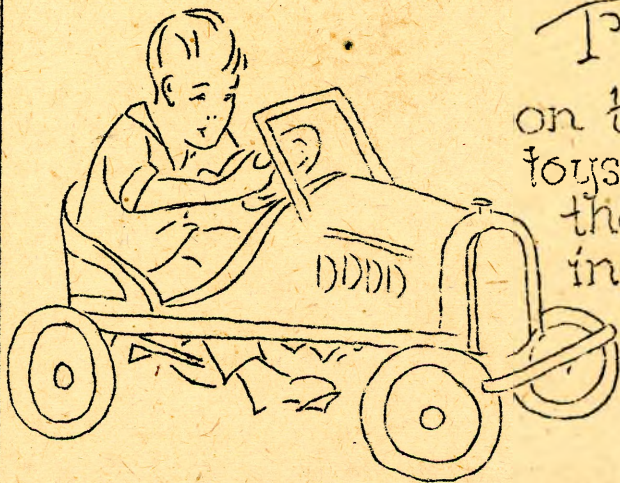

As to the Candidates for the Council-Mr.McCrillus, Mr.Amidon and Mr. Bennett for new members; with Mr. Griffing for re-election-they cannot be bettered for a selection of high-class, level-headed business men of unquestionabl integrity.

For Clerk and Treasurer, everyone agreed that Mr. H.H.Hawthorne was indeed well qualified and unanimously voted to support him.

For Tax Assessor, Mr. Lawrence C. Molten was selected. Everyone knows Larry and concedes him to be the man for the job.

Last, but not least, were selected Mr. MacDonald and Mr. Potts for the office of Marshal- both good men and true. Already well-known in the Town's service. Nothing too good can be said of either. May the best man win and may peace and harmony prevail at our November election.

Office Hours: 8:30 A.M. to 1:30 P.M.

LEGAL NOTICE OF HEARING ON ADOPTION OF AN ORDINANCE

TO THE CITIZENS OF THE TOWN OF MIAMI SHORES:

Notice is hereby given that a public hearing will be held on the twenty-sixth day of September, A.D. 1927, at eight o'clock P.M. in the Council Chamber of the Town Hall, Potts Building, Miami Shores, Florida, on the question of the adoption of the following Ordinance:

AN ORDINANCE, Declaring it expedient to exercise the authority conferred by Section 1925 of the Revised General Statutes, and determining to issue Electric Light Bonds of the Town of Miami Shores in the amount of \$185,000.00, upon this Ordinance being ratified by the voters; providing for an election for said purpose, and prescribing the date, maturities and interest rate of the bonds.

BE IT ORDAINED BY THE TOWN COUNCIL OF THE TOWN OF MIAMI SHORES:

Section 1. That it is hereby declared to be expedient for the Town of Miami Shores to exercise the authority conferred by Section 1925 of the Revised General Statutes to construct, establish and maintain a plant for the manufacture and distribution of electricity for furnishing light for municipal use and for the use of such of its inhabitants as may require and pay for same; and the Town Council hereby determines that it is expedient to purchase land and erect thereon a Municipal Electric Light Plant and equip such Plant, and to purchase, erect and install poles and lines for the distribution of electric current.

Section 2. That Electric Light Bonds of the Town of Miami Shores shall be issued, pursuant to Section 1928 of the Revised General Statutes, in the amount of One hundred eighty-five thousand dollars, (\$185,000.00), said bonds to be dated January 1st, 1928, to be numbered from one (1) to one hundred eighty-five (185) inclusive, and to mature serially as follows:- \$10,000.00 shall mature on January 1st of each year from 1931 to 1943 inclusive, and \$11,000.00 shall mature on January 1st of each year from 1944 to 1948 inclusive, said bonds shall bear interest at the rate of seven percent (7%) per annum, which interest shall be payable semi-annually on the first day of January and July of each year, and both principal and interest shall be made payable in gold coin of the United States of the present standard of weight and fineness, said bonds to be registerable as to principal.

Section 3. This Ordinance shall take effect after it shall have been passed by a two-thirds (2/3rds) vote of the members of the Town Council at a meeting duly called and held for that purpose, and received the approval of the Mayor, and thereafter have been ratified by a majority of the voters of the Town of Miami Shores voting thereon at the annual municipal election to be held on the 22nd day of November, 1927, and the result of such vote duly declared by the Clerk of the said Town, and recorded in the Minutes of the Town.

Section 4. At said election, there shall be submitted to the qualified electors who are owners of real estate and who shall have paid the taxes thereon for the year when such taxes were last due, and who shall be freeholders in the limits of the incorporated Town of Miami Shores, Florida, the following question: -

LEGAL NOTICE OF HEARING ON AN ORDINANCE AND CONTENTS OF THE ORDINANCE

"Shall the Town of Miami Shores purchase land and erect thereon a Municipal Electric Light Plant and equip said Plant, and purchase, erect, and install poles and lines for the distribution of electric current, and issue bonds in the amount of \$185,000.00 for said purposes, as provided in Ordinance No. _____, duly passed by the Town Council on the _____ day of September, A.D.1927? "

Section 5. The Registration Books of the Town of Miami Shores shall be open from 8:30 A.M. until 5:30 P.M. each day at the Town Hall from the first day of October, 1927 to and including the nineteenth day of November, 1927.

Section 6. This Ordinance shall be published once each week for four weeks preceding said election in "The Miami Herald", a newspaper of general circulation published in Dade County, Florida, and also in "The Miami Shores Bulletin".

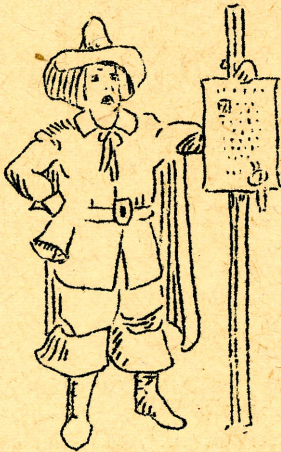

W.P.BRION

Mayor.
