Re: Virginia Key Restoration Project

Please review the attached information regarding the Virginia Key Wetlands Restoration Project North of the historic Virginia Key Beach Park (VKBP) property. The project, (managed by Gary Milano, DERM), will take approximately one (1) year to complete and requires coordination between the Trust, CIP contractors working on the VKBP parking lot project and DERM.

The start date of the project is January 13, 2006 and would end within its given timeline of one year. Restoration of the approximately 50 acres to VKBP's North will require access through VKBP. This land clearing activity will take place along side the parking lot project's construction schedule and will need to use the North circulation road on the VKBP parking lot.

I will continue to work closely with all parties involved and continue to give project updates as needed. If you have any questions please feel free to contact me at 305-571-8230.
