

# Virginia Key Beach Park Trust

## Planning & Construction Committee

### Talking Points for the March 3, 2008 Board Meeting

- The Planning and Construction Committee met February 12, 2008.
- The committee discussed the completion of the exotic removal and stump grinding project on Historic Virginia Key Beach Park. At that time the project required some additional stump cutting and shoreline clean up which was completed prior to the grand opening of the park.
- The start of phase two of the environmental restoration of the beach park is the need for a landscape and native plant replanting strategy coordinated with the shoreline restoration project presented by Gary Milano, DERM. DERM is providing design assistance to the beach restoration project.
- A general update was given on the status of the DERM Virginia Key Restoration Project. The project was completed in mid February prior to the grand opening of the park.
