

Virginia Key Beach Park Trust

Planning & Construction Committee

Talking Points for the October 2, 2006 Board Meeting

- The Planning and Construction committee met September 18, 2006 – 6:10pm.
- The committee discussed construction project updates centering on the status of the Parking Lot and Circulation Road Improvement Project. Heavy construction has begun and the project is currently right on schedule as projected by CW Construction. **(See the current construction timeline and photos in your board packet)**. The entire parking lot construction project will take approximately 8 months to complete.
- The committee and Trust staff also see the need for the committee to hold a strategic planning session or series for sessions in the near future to better align the capital improvement projects' construction schedules and funding sources essential to the park's 2007 opening date.
