

Florida's State Land Opening

15,000 Everglade Farms Sold Since March, 1909

Major quantities of land have been opened for sale in the Everglades since March, 1909. The land is being sold in small parcels, each of which is suitable for a single family farm. The land is fertile and well watered. It is situated in the heart of the Everglades, where the soil is rich and the water is pure. The land is being sold at a low price, and the terms of sale are liberal. The land is being sold by the State of Florida, and the proceeds of the sale are being used for the benefit of the State.

THIS IS THE MOST FERTILE SOIL IN THE WORLD

According to the Report of U. S. Geologists and Pacific Survey

The soil of the Everglades is the most fertile in the world. It is rich in phosphorus and potassium, and is well watered. The soil is situated in the heart of the Everglades, where the water is pure and the soil is rich. The soil is being sold at a low price, and the terms of sale are liberal. The land is being sold by the State of Florida, and the proceeds of the sale are being used for the benefit of the State.
