

Dear Sir:

You have no doubt heard of the projected Tamiami Railway, a corporation chartered by the State of Florida, and to which the City of Miami has granted a franchise through the city. This road is to be constructed from Miami to the Gulf coast and ultimately to Ft. Myers. Our project and plans have been endorsed by Mayor John N. Watson, and the Miami Chamber of Commerce.

The building of this line will open to settlement and cultivation a great and rich country now practically inaccessible. Every acre of land along the route of this road and every acre of land within five miles of its rails will be benefited and its value increased four fold or more. This road, furnishing as it will, transportation facilities will <sup>actually</sup> create a value for your land and bring it into the market.

We know we have your commendation of this proposition, but by reason of your ownership of \_\_\_\_\_

\_\_\_\_\_ you will be directly financially benefited and we want your financial assistance as well.

We want you <sup>in consideration</sup> to subsidize the immense benefits and newly created value to your lands and lend your assistance to the <sup>building</sup> construction of this road by subscribing for \_\_\_\_\_ to the capital stock of the corporation, conditioned upon the constructing this road within a period of two years.
