Mr. W. J. Krome,
Homestead, Fla.

Dear Mr. Krome,

Mr. Ingraham's office is making enquiries as to possibility of draining the prairie portion of Township 58-38, so that the Company can sell more cropping land.

I remember that you told me you had this matter looked up in connection with the Extension water supply and that the levels did not indicate any practical way of drainage. If my memory is correct, have you any notes on the matter that are conveniently accessible. We want information also as to the levels in 59-37 and on to Barnes Sound.

Yours very truly,
