Mr. Frank J. Pepper,  
c/o Pepper & Potter,  
Miami, Fla.

Dear Mr. Pepper:

Last Saturday afternoon Mr. Graham called me into conference at his office with Captain Waldhauser and we arranged for an inspection trip over a portion of the route of the Biscayne Canal this morning.

Have just returned from this trip and Capt. Waldhauser wishes to confer with you as early as possible for the purpose of securing plats and other data which are available from the Biscayne Engineering Company.

Capt. Waldhauser is of the opinion that all of the five or more miles of canal in the Biscayne District can be dug without blasting rock and has also stated that he thinks it can be dug at approximately the figures estimated by Mr. Graham.

We are sure that you will give Capt. Waldhauser every assistance possible and we also hope that you are successful in working out the further details of calling the next meeting at an early date.

Very truly yours,

*Arthur M. Griffing*
