April 4, 1923.

Mr. J. A. Moore,
% Biscayne Engineering Company,
Miami, Florida.

Dear Mr. Moore :-

The property owners in the Biscayne Drainage District are hurrying the Drainage Commission for report and recommendations to the County Commissioners, and I wish to urge you to kindly complete your report in this matter at the earliest date possible.

On account of ill health, I am leaving the City today for a period of 10 days or 2 weeks and on account of my absence I wish to request that as soon as your report is ready that you deliver it in person, to our Attorney, Mr. Mc Caskill, who has been requested to call a meeting of the balance of the Committee and yourself to go over the figures and decide as soon as possible, upon the final and formal report and recommendations to be made to the County Commissioners.

Some of the property holders have expressed themselves as feeling that this work should have been completed before now but I have tried to explain to them that it was quite a large and difficult job but we hope to have it ready within a few days, and I will appreciate it very much if you will give the matter your personal attention and rush it through as much as possible.

Yours very truly,

Chairman.

FEP/D.
