BAY CITY HOOP CRANE - FITTED WITH CLAMSHELL, DIPPER,
DRABLINE, HOOK, MAGNET OR SKINNER ATTACHMENTS

BAY CITY, MICH.

December 28, 1922.

Mr. Frank J. Pepper,
Miami, Florida.

Dear Sir:

We notice that you have been appointed one of the Commissioners of the Biscayne Drainage District and we presume your district will very shortly be contracting for excavation of your drainage canals or securing equipment to do the work yourselves.

We are mailing under separate cover a copy of our catalog and call your attention to the BAY CITY Land Dredges both Walking and Caterpillar traction which are entirely suitable for your work. The writer has been in Miami territory several times and is familiar with the country.

Even though you may have considered contracting work, you might yet consider the purchase of equipment to construct your ditches and then have the machine on hand for future maintenance. The drainage ditches in your section need cleaning out from time to time due to the rapid growth of vegetation and it is usually cheaper for the district to do this work than to contract it.

If we can be of any service to you in this connection, we shall be glad to hear from you.

Yours very truly,
BAY CITY DREDGE WORKS,

W. S. Ramsay
president.

WSR-FS
CAT. "D"

P. S. We understand you control a large acreage in the recently formed Biscayne Drainage District.
