December 1st, 1923.

Mr. A. H. Sawyer, Pres.,  
Boston & Florida Atlantic Coast Land Co.,  
10 State Street,  
Boston, Mass.

Dear Mr. Sawyer:-

There has been a movement on foot for some months started by some of our energetic friends in the Southern end of Dade County towards the formation of a large Drainage District to take in most of your Companies' lands South of Homestead. The Model Land Company and Thompson & Jackson, also, have large holdings that would be affected.

We are of course, as usual looking after your interests, as well as those of these other companies, but thought it not untimely to give you this information by way of putting you on guard in case you got any communications or calls from any Committee in regard to the matter, and would suggest that in case you did that you inform them that the matter is in our hands.

You understand, of course, that it is not our intention to commit you definitely one way or the other until such information has been gathered as we think is necessary and a full report made to you.

Our attitude up to this time has been one of opposition in the matter because we have not been able to satisfy ourselves that it would be a good thing for ~~your~~ companies.

Yours very truly,

PEPPER & POTTER,

By

FJP/L.
