Mesars. Pepper and Potter,
Miami, Florida.

Gentlemen:

I am reliably informed that a new drainage district is in process of formation extending from the Naranja District and the Florida East Coast tracks south and east to the Bay, and I am writing to ask whether or not you have any definite information with reference to this matter, and if so the present status.

I believe we have something like 20,000 acres in this district, and I am sure we are not in favor of the creation of any more drainage districts at this time.

Yours truly,

J. W. Hoffman
Vice President.
