SUBJECT: Sugar Cane - Experimental Planting - on Marl Soil.

Mr. J. M. Holferty,
Goulds, Fla.

Dear Sir:

We have just received a letter from Mr. J. W. Hoffman, Vice-President of the Model Land Company, reading as follows:

"I am today advised, by Hon. E. W. Brandes, Principal Pathologist in Charge of Office of Sugar Plants, Washington, that he is instructing a representative at Canal Point to send a selection of varieties of sugar cane cuttings, including 36, 213, 234 P.O.J. and C. P. 807, to Mr. Holferty, Goulds, Fla.

Will you kindly advise Mr. Holferty, asking him to acknowledge receipt to you, so I can likewise acknowledge receipt to Mr. Brandes."

Please be on the lookout for these cuttings and we will appreciate it if you will advise us immediately upon receipt of same so we may advise Mr. Hoffman.

Yours very truly,

PEPPER AND POTTER, INC.
