SUBJECT: Sugar Cane - Experimental Planting on
Marl Soil.

Mr. J. M. Holferty,
Goulds, Fla.

Dear Sir:

Referring to conversation recently re-
garding a demonstration planting of sugar cane.
I have taken this matter up with Mr. J. W. Hoffman,
Vice-President of the Model Land Company and he has
written us stating that he is looking into the matter
of securing seed and as soon as he has something
definite along this line, will advise us, and states
further that he is very much interested in a demon-
stration as to whether or not sugar cane can be suc-
cessfully grown on marl soil and will be glad to
assist in any way he can. We will keep you advised
of further developments.

Yours very truly,

PEPPER AND POTTER, INC.
