

Dec., 23, 1929.

SUBJECT: Inquiry - Cape Sable Lands.

Mr. J. W. Hoffman, Vice-Pres.,
Hodel Land Company,
St. Augustine, Fla.

Dear Sir:

460
SW 18th Terrace
1888-

Mr. W. A. Roberts, a Surveyor, who has been connected with the Chevelier Corporation for a number of years, called in today looking for some data that will assist him in locating some canals and ditches that were dug by the Company a few years ago, with reference to section lines, in the vicinity of East Cape, and we are desirous of assisting him as much as we can as he is looking up and reporting on the physical condition and location of some property in this vicinity for some parties who seem to be interested in the acquisition of possibly seven or eight sections of land down there. We expect to get more definite information from these parties a little later as to just what they are looking for, but in the meantime we would appreciate it if you would send us any maps or notes you may have in your office bearing on the location of this work that was done, particularly the canal that was to operate as an outlet, to the Bay.

Thanking you in advance for this information, and with holiday greetings from this office, we beg to remain,

Yours very truly,

PEPPER AND POTTER, INC.
