

Frogman full

Sept. 8th. 1925

Dear Van:-
Hink-les-cha gis.

Under a sepatate cover I am sending you the
old Pelly Parker home place abstract, just received
it this morning.

I hesitate very much to put any more burdens
on you when I well knew how very busy you must be, but no
one else can so well handle this proposition.

At the present time I have a letter out to the
Dr. Gray suggesting that he come to Florida this winter
and visit the Seminoles with me, that he may have a first
hand information as to their actual condition. Should
we get up this trip I would want you to be one of the
party.

The way Florida is filling up, it is only a
question of time when our Indians must go to their lands
for homes. Then if we can get them established in the
raising of hege and cattle pure bred, - then I will feel
we are getting our labor of love accomplished.

Faithfully Yours,
